All Trees in This Collection Guaranteed to Live

Above collection (12 select trees), fruit tree food, hastening growth and fruiting, and 100-page "Modern Methods Fruit Book," delivered free, cash with order for..... **\$5**

See pages 5, 14, 16, 17, 21, 41, and 45 for collections of Apples, Pears, Raspberries, Roses, etc., delivered free with "Quick Fruit" fruit tree food and book.

We never send Fruit Book unless it is asked for. Thousands of our customers already have it. See page 50 for index telling you where to find anything.

Why we can afford to sell strictly first-class trees and plants as low or lower than others, deliver them free, guarantee them to live and grow and give free Tree and Plant-Food and Book.

See Pages 43 and 44 for Price List.

Remember This Offer Refers Only to Collections on Pages 3, 5, 6, 14, 16, 17, 21, 41, and 45.

With the advantages of soil and climate we can grow them for less. Freedom from diseases and an even maturity of trees and plants leave few culls, nearly all being first-class stock. Then our open climate enables us to handle them economically and without the loss inevitable with cellared stock.

These advantages enable us to sell the highest grade of trees and plants as low or lower than others and to give small growers, the ones that need it most, the very great lift of delivering free and furnishing tree and plant-food to give a quick start. Our 100-page book tells how to keep it up and make fruit pay.

WHAT "MODERN METHODS" MEANS

All trees in collections are grown by modern methods, which means the selection of the very best up-to-date varieties; then the growing of the young trees full of vigor by starting each kind in its natural soil, which our location in the greatest natural nursery region in the world enables us to do; then pruning them to a perfect balance of root and branch, and then furnishing the fruit tree food to give them a quick start. All that we do. Then it means planting, manuring, pruning, and cultivating them on plain sensible principles. That our 100-page book makes plain and simple to you, no matter how "green" you may be in fruit-growing. Every tree is freshly dug, carefully packed to reach you in perfect order, and with each tree comes nearly half a pound of highly concentrated fruit-tree food, which will greatly hasten growth and fruiting. Our 100-page book, *Modern Methods in Fruit-Growing*, is well worth \$25 to any grower.

Trees in all collections are the very pick of our immense stock, so perfectly balanced in root and branch growth that they will grow fast and come quickly into bearing. They are put into perfect shape before leaving us by being pruned root and branch precisely right, saving you all doubt and trouble in that respect. They are packed with extra care so as to arrive as fresh as when dug. With each collection is sent enough strongly concentrated (highly ammoniated) Modern Method Fruit Tree Food to push the trees into quick growth and fruiting. This food, combined with their superior vigor, brings them into bearing at two years old, a year younger than ordinary trees.

We also send our 100-page book, worth \$25 to any fruit-grower because it not only tells, but shows, by clear practical cuts, how to plant, prune, manure, and cultivate all kinds of fruit. Page 13 tells also about the book and fruit tree food. See pages 3 and 45 for collection of Peaches selected for their delicious flavor, ripening without a break from May to November.

Quick Money Fruits and fruits that lower the cost of living. Fruit's power as a moral agent in lessening the craving for dope and drink and making home attractive has long been recognized. Then good fruit not only improves health, lessens doctor's bills, or keeps the doctor away entirely, but properly used it makes an immense saving in food bills; and all not consumed at home can quickly be turned into cash.

Alive to the importance of quick relief for the high cost of living, we are offering, at a moderate price, trees and plants of highly-improved, quick-fruiting varieties. These we are delivering free in collections and giving "Quick Fruit" tree and plant food, which greatly hastens growth and fruiting. We also send free a plain, practical book telling how to grow all kinds of fruit quickly and in large quantities, and then how to sell it or how to serve, preserve and can it to the very best advantage. Remember that Never-Stop, our great Everbearing Strawberry, planted this fall or winter, gives you a full crop of delicious berries summer and fall of 1926. Our Everbearing Raspberry planted now gives this exquisite fruit from May to September, 1926. With our trees, tree food and book, you will have peaches in two years and other fruits as quick in proportion.

WE RESERVE THE RIGHT TO SUBSTITUTE OTHER VARIETIES IN COLLECTIONS ON PAGES 3, 5, 6, 14, 16, 17, 21, 41, and 45, IF IT IS NECESSARY. We are forced to do this to protect ourselves, but of course we only substitute a variety of equal value, and which ripens its fruit at the same time as the tree or plant for which it was substituted. These collections have found such a ready sale that we are sometimes unable to supply as many trees of one or two of the varieties as we need.

Choice Select Fruit Trees for the Home Orchard

All trees in the following selections delivered free with quick fruit tree food to hasten growth and fruiting and our Modern Methods Book, covering fruit growing from A to Z. Every tree guaranteed to live and grow off or replaced free of charge.

SEE WHAT HAS BEEN DONE ON A PATCH THE SIZE OF A VERY SMALL ROOM

100 plants have yielded \$25 worth of Never-Stop Berries (100 quarts at 25 cts.), in a bed 12x12 feet, size of a very small room, or at the rate of \$7,500 per acre.

Never-Stop THE GREAT EVERBEARING Strawberry

Fruits April to December. Bears Full Crop First Year. Plant-Food Free, Which Greatly Increases the Crop.

Sweet, mild flavored; needs no sugar. Delicious table berry. Big profit in it for home or nearby fancy market.

Has been tested for seven years, from Virginia to California, with wonderful success. Well adapted to all parts of the country. See testimonials, from twenty-one states, on opposite page.

Never-Stop continues to bloom freely till heavy frost sets in late in the fall. But long after that quantities of splendid berries remain under cover of the dense foliage till the heavy freezes set in, here usually just before Christmas. Its hardihood in this respect is one of the wonders of the Never-Stop.

While Never-Stop fruits spring, summer and fall, it is far best the first year to pinch off all blooms as fast as they come till plants get full growth, say August 1. It will then bear heavily all late summer, fall and early winter. Do this and depend on the spring-bearing varieties we send with each collection for early berries.

Second year Never-Stop can be allowed to fruit all season round. Plants after fruiting all of the first summer and fall will the following spring bear a tremendous crop of berries. In fall, 1920, we gathered from a small plot at the astounding rate of about 30,000 quarts an acre. True, the season was unusually favorable. Still, in our over forty years' experience in fruit, we never before had a variety to come anywhere in sight of that yield.

Plant in beds as shown above, or, if you have plenty of space, in rows 2½ feet apart, 15 inches apart in row.

DELIVERED FREE

100 Choice Never-Stop plants, selected for heavy bearing.....	\$3.00
100 Choice Giant (largest and handsomest of all berries), spring-bearing plants to suit your locality.....	3.00
Value.....	\$6.00

But for Cash with order we will send not only the 200 plants above, but also 100-page "Modern Method Fruit Book," with Strawberry plant-food for 1 year for **\$4.50**

Splendid Success of Never-Stop

Selected from the Thousands of Testimonials We Get

DISTRICT OF COLUMBIA

The Never-Stop Strawberry plants you sent a year ago last fall have proven a good variety and am pleased with the plants I had. Between June and July and November picked 40 quarts of berries and they have already started to bud and bloom this spring. Grant B. Bruce, Washington, D. C.

PENNSYLVANIA

The Never-Stop Strawberry far surpasses my most sanguine expectations, as I am gathering nearly a quart of fine berries every other day from 100 plants. J. B. Spencer, Llanerch, Pa.

NEW YORK

The only continuous ever-bearer we found. Picked today (January), in the open, berries as fine as any on your catalogue envelope. H. B. Fuller, Jr., Medford, L. I., N. Y.

ILLINOIS

Fruited finely all last summer and fall. Had some berries late as December. Had 50 years experience. Think it the berry for the garden. F. Danksch, Villa Ridge, Ill.

KENTUCKY

Been ripening since May, delicious berries every day. Never expect to plant any other kind. J. M. Jennings, Arlington, Ky.

TENNESSEE

Make price on 1,000 Never-Stop plants. I set 200 last April, kept blooms pinched off until the first of June and had berries continuously until the middle of November. They were set on land that had not been manured or cultivated for over 50 years. J. G. Potter, Jonesboro, Tenn.

MISSOURI

I wish to say the Never-Stop Strawberries are wonderful. Never saw anything to beat them. They are very fine and abundant bearers and many grew to be 1½ inches through. My Giant you sent me were strong vines and large berries. W. T. Wilkerson, Mexico, Mo.

KANSAS

Had plants from New Jersey, Michigan and Iowa but your Never-Stop outgrew all and bore fine berries till freezing weather. Dr. H. T. Johnson, Cottonwood Falls, Kans.

NEW MEXICO

After four years' test have decided to cut out all other kinds. Intend to make growing of the berry my business, establishing farms in different parts of the country. It must have a big future. W. H. Ried, Las Crecus, New Mexico.

ARKANSAS

My success with Never-Stop was phenomenal, picking last on 14th of December. Dr. J. W. McCracken, Sulphur Springs, Ark.

As to Never-Stop Strawberries, they met every expectation. The only thing is to keep them from bearing themselves to death. They are indeed a mystery in the berry family. W. S. Ellis, Jonesboro, Ark.

LOUISIANA

I have some Neva-Myss Peach Trees I bought from you 10 years ago, and some I bought three years ago. I believe the Neva-Myss is the best early peach I can buy. J. R. Smith-Wilson, La. June 8, 1924. The 100 Never-Stop plants I got from you last fall produced over 20 gallons of fine berries this summer and are still bearing some, although we have had a continued drouth for several weeks now. R. E. Rushing, Monroe, La.

I inclose check for 600 Giant and 600 Never-Stop Strawberry plants. Only had a few from the Giant last spring but the people I sold them to said they are wonderful, sweetest and finest flavor ever eaten. Orders were far in excess of supply. Miss Jessie A. Lea, Bastrop, La.

Beg to say plants bought of your firm last spring did magnificently. Will be glad to send you photo of one of Never-Stop plants as soon as complete. The plant being 18 inches in diameter containing upward of 200 buds and blooms and berries with 181 ripe berries at the time photo was taken. J. T. Robinson, Covington, La.

OHIO

A number of years ago I bought some of your Everbearing Strawberries (and they are) and as I have bought another country home, I wish you to send me your latest catalogue and price list of all of your goods, for I will need a lot of stuff to fix up this place. J. G. Ray, Barberton, Ohio.

GEORGIA

Please find enclosed herewith my check for \$3 for 100 Never-Stop Strawberry plants. Please ship them as early as possible. The other plants ordered from you were as you advertised them. I think I will have some berries real soon. J. L. Mercer, Gray, Ga. I have been a customer of yours for years. I was the first one in this section to plant the Neva-Myss Peach; also a few years ago I bought 100 Never-Stop and they did fine. I am getting old and do not expect to be here long, but if I remain here long and need anything in your line I will order. R. P. Williams, Winder, Ga.

Had a few of your Everbearing plants and they stood the dry summer better than the Lady Thompson. L. F. Cater, Perry, Ga. October 15, 1925.

ALABAMA

Please give me your best price on a 1000 Never-Stop Strawberry Plants. I want a berry that will bear more than one crop. I have had some of your Never-Stop and they do fine here. L. L. Ledbetter, Anniston, Ala. October 20, 1926.

SOUTH CAROLINA

I am delighted to report that my Never-Stop Strawberries ordered from you are a complete success. Far better than we expected. Have had strawberries all the year, notwithstanding it has been a dry year. All you say about them is true. J. R. Tolleson, Gaffney, South Carolina.

MISSISSIPPI

Enclosed find check for 100 Never-Stop Strawberry Plants. I ordered plants from you last March and we had all the berries we could use. My peach trees and pecan trees were put out last March and people say they have never seen anything grow like they have. I believe they will bear this year. Mrs. J. P. Henson, Yazoo City, Miss. January 6, 1927.

NORTH CAROLINA

Several years ago I ordered some Never-Stop Strawberries from you and they were fine. Miss Ina Higley, Lumberton, N. C. March 4, 1927.

In 1920 I ordered just 100 Never-Stop Strawberry plants from you in the early spring, which I planted and never saw so many nice berries picked from same. They bore all through the spring, summer and fall without a stop. For five weeks I picked each day an average of 10 quarts; some days I picked as high as 14 quarts from same. They had the best flavor I ever tasted. All of my neighbors said they were some fine berries. They were so large that some of them would measure 2 inches in diameter. I believe that your plant food added greatly to the yield. I shall always recommend your Never-Stop to my friends. The plants are so strong and well-rooted that they will all grow and bear nice berries. Anyone wishing to grow strawberries will surely do well to buy Never-Stop from you. Last plants ordered were real nice ones. W. E. Lewis, Vanceboro, N. C.

I ordered some trees and 100 Never-Stop Plants from you about five years ago, which did fine. I can furnish a testimonial that will far surpass any you have listed in your catalogue on Never-Stop berries and one that will, I believe, add greatly to the sale of your plants. Again will say that I am very proud of plants just received. W. E. Lewis, Vanceboro, N. C. March 15, 1926.

VIRGINIA

I would like to say that our Never-Stop Strawberries were a complete success, one plant having sixty-three berries on it at one time. A perfect curiosity. Mrs. W. W. Lanier, Jr., Petersburg, Va.

My Strawberries (Never-Stop) bore nicely until December. Mrs. L. J. Daughtry, Holland, Va.

Your Never-Stop beats anything I ever saw. 50 plants supplied my table with luscious berries from July until December, picking the last December 23, besides I sold about 15 quarts. Mrs. W. B. Stidham, Roanoke, Va.

TEXAS

Enclosed find order for 500 of your Never-Stop Strawberry Plants. I want to put out a good sized patch of them as I have had good success with the ones that I have tried here before. Perry Thomas, Silvertown, Texas. March 23, 1925.

ABOVE PLANT AT
FRUITING TIME

Add 10 to 50 Per Cent to Your Strawberry Crop

It is an undisputed fact that rust, blight, and obscure fungous diseases cut down the Strawberry crop of the whole country from 10 even up to 50 per cent, if the weather of the fruiting season is exceedingly favorable for the spread of these diseases. These diseases cover the country like the dew, no matter how loudly some sections may claim to be free from them. While they do some harm in killing the leaves and checking growth during the summer, it is at fruiting-time that the great damage is done. They attack the long, delicate stem on which the fruit grows, sap its vigor, and lessen the size of the berry, often deforming it and making it knotty. This is the chief reason that Strawberries run smaller and of a poor shape toward the end of the season. By that time disease has got in full possession of the infected plant. Of course, the difference shown in the illustration on the opposite page is an extreme case, but, except in exceedingly rare seasons, the disease is there and it tells on the profit all the way from 10 per cent up.

Only the most heroic remedy that goes right down to the bedrock of the trouble will destroy disease as deep seated as this. We strip all parent plants down to the bud and plunge them head and ears in strong fungicide before planting. This destroys every germ of disease. The plants are then set on fresh land. The result is that plants grown in these fields are absolutely free from rust and blight, and that no matter how prevalent these diseases are in your neighborhood your fields set with our plants will not suffer to any appreciable extent the first two years, no matter how unfavorable the weather may be for the plant or favorable for the disease. You will get a larger and finer crop of berries with a much smaller proportion of small and knotty berries, which always ruin the late pickings from diseased plants.

The parent plants, after the above treatment, are not allowed to weaken themselves by fruiting. All blooms are kept off and the whole vigor of the plant thrown into making the young plants which are sold to our customers for planting. This is believed to throw greater vigor into the young plants. It certainly has the effect of making young plants take root early in the season, and gives them full time to complete their root-growth by fall. We never strip the young plants we sell; they would not ship as well. We leave enough of the old growth around the bud to protect it.

Our Trees and Plants Are Better Than the Common Run

BECAUSE THEY ARE GROWN BY MODERN METHODS, THAT IS, EACH IN ITS NATURAL SOIL

The success of everything depends upon the start it gets and especially is this true of the fruit tree and plant, for there are more points essential to the highest success with fruit trees than anything else in the world. Trees and plants instead of loafing must get right down to business and come into bearing young. Of the fruit there must not only be quantity but, what is nowadays even more important, quality. And quality embraces many things—size, color, shape, flavor, firmness, keeping qualities, etc.

How Can We Give the Right Start?

WE CANNOT DO IT OURSELVES. ALL THAT WE CAN DO IS TO GIVE NATURE A FREE HAND AND LET HER DO IT.

We have to start the young tree in its natural soil—in the kind of soil in which nature started it when she called it into being—created it. Now probably nowhere else in the world is there as great a variety of soils right side by side as in the North Carolina hills. Our twelve nursery farms extend right through the heart of this natural nursery region. Side by side we have the stiff soil in which the young peach tree must start to be free from borers and other enemies; the well-drained loam on which the young apple tree is freest from knot and gall; the gravelly hill for the young cherry tree, in the pockets between the hills the deep, peaty loam for the pear; and in others the alluvial soil—mixture of sand and humus—for the hedge plant, reproducing identically its habitat on the Amoor River in Siberia.

We have at command an almost unlimited quantity of fresh land which enables us to grow all trees and plants on clean, uncontaminated soil.

Then we are situated in the country at an average altitude in an average climate. Our growing season is long, enabling trees and plants to mature thoroughly.

Our open winters enable us to ship trees and plants dug right fresh from the ground instead of the stale, cellared stock often sold. The result is that trees and plants grown here are acclimated—that is, at home over the whole country—north, south, east and west—and are surer to live and succeed than if they did not have this advantage.

We do not mean that other nurserymen are ignorant of the forementioned soil advantages and that they do not avail themselves of them as far as possible; but few, if any, are so favorably situated in that respect as we are. Nor do we claim that the start we give trees will do it all. It gives a substantial advantage more than equal to the cost of the trees and plants, but it is only one step in Modern Methods. For the best results, it must be followed by Modern Methods in planting, in pruning, in manuring, and in cultivating, all of which are explained by the story and plain cuts in our 100-page book.

All that we ask is that you compare our trees with the common run. The huge, gawky size of common trees is a mere matter of heavy manuring, and when not backed up by root-growth is a positive disadvantage. But note the wealth of roots of our trees and the perfect balance between root and tree, and the general business-like look of the whole combination. We destroy all over-size trees as carefully as all under-sized ones.

Strawberry Plants

Grown by Modern Methods

That is, from parent plants not allowed to weaken themselves by bearing, and which are treated by fungicide, insuring perfect health. It increases the crop 10 to 50 per cent according to season.

What do we mean by plants grown by Modern Methods? See page 9 for full description. To prove that we are right or wrong write to your state agricultural department and ask them what effect that method of growing will have on the health of the Strawberry plant.

Too Many Varieties

There is only confusion in the endless number of kinds of Strawberry plants now offered for sale. We have tested nearly every variety that has come out in the last forty years. Varieties that twenty years ago we found worthless, or at least inferior to

others of the same class, are still being pushed and sold. We believe that we have done a real service to the public in sifting out the kind most generally successful over the whole country and dropping the undesirable or unnecessary varieties.

We Grow Our Own Plants. No Second-Hand Plants Sold.

We are one of the few large Strawberry plant shippers that grow all of their own plants. Nearly all of the others are situated in the midst of thousands of small growers, who grow berries for market, and from whom their plants come at second hand. Of course, there is great risk in setting plants grown in this off-hand way. You run great risk, not only of buying mixed plants, but of getting absolutely the wrong kind. Then there is the very serious danger of disease—the deadly black root, weevil, etc.—which once brought on your land would quickly drive you out of business. Among so many growers, constantly bringing in new varieties from every quarter, more or less disease is unavoidable. That we make enemies by this statement and draw attacks upon us, we well know. But we are stating facts—the plain, unvarnished truth.

We are in a natural Strawberry region separated by a hundred miles or more from all other growers. Our plants are grown on our own farms, and on rigid scientific principles.

How to Grow Big Crops of Strawberries

A large part of our 100-page book, "Modern Methods in Fruit-Growing," is devoted to the Strawberry. It shows by plain cuts the best and most economical implements to use, and exactly how to set the plants for quick growth. It tells how to select the best land; how to grow for home use or market; how to plant, manure, cultivate, gather, and pack. It gives a simple, effective mode of protecting blooms from frost.

In short, it follows the Strawberry from the time the plants arrive at your place till you sell the fruit and pocket the money. Nor does it stop there. It follows the fruit you raise into your home and tells the housewife the numberless ways it can be used as dessert. How to make delicious Strawberry shortcake. Strawberry ice cream; how to preserve, can, make jelly, jams, etc.

THIS BOOK IS FREE WITH EVERY ORDER OF \$5 OR OVER, AND WITH

THE COLLECTIONS ON PAGES 3, 5, 6, 14, 16, 17, 21, 41 and 45.

OUR MODERN METHOD PLANTS BEAR 40 DAYS AFTER PLANTING. DESPITE FREEZE MAKES TREMENDOUS PROFIT

I promised to write you and tell you how the strawberries turned out. I sent you my check to pay for 3500 plants on the 27th of Oct. You shipped the plants on the 9th of Nov. The plants arrived in good condition and we got them all set out on the 16th of Nov. I picked the first ripe berries on Dec. 26th. Just got to picking good by Jan. 5th. Had a big freeze on Jan. 6th, another big freeze on Jan. 11th, and another on Jan. 16th. Froze every berry and all the blooms. They put out a new bloom and we got to picking again about the 15th of Feb. Picked berries every day to May 21st. Sold for cash \$258.60 and had berries on our table every day.

Paid for fertilizer.....\$5.00
Paid for labor.....30.00

Net \$220.60.

Total expense.....\$35.00

But for the Jan. freeze would have made a good showing.

Wm. S. Smith, Palmetto, Fla., July 1, 1927.

Extra-Early Strawberries

Price List on Page 43.

Excelsior. A standard extra early variety that succeeds everywhere; firm, brilliantly colored. Fine table berry when perfectly ripe.

Missionary. Ranks fully up with Excelsior as a standard extra-early shipper and table berry generally. In most places it is taking the place of Excelsior. A heavy bearer of fine fruit.

Helfin's Early. In large regions of the South and central parts of the country, Helfin surpasses all other varieties in large size, brilliant coloring, and profitableness.

Premier. A popular early variety in some sections.

KLONDIKE
The Greatest Shipping Berry.

Senator Dunlop. The standard all-purpose berry through an immense region of the West and Northwest. Specially valuable in regions subject to drought, being equal to Klondike as drought resister.

Brandywine. A large, highly productive variety that fruits continuously for a long time. Succeeds everywhere.

Early Kinds

Genuine Klondike. This is the standard early shipping berry. It succeeds everywhere. Ripens close on the heels of Excelsior and Missionary. Productive, brilliantly colored and so firm that on the great northern market it classes as a re-shipper, that is, a berry firm enough to reship to the smaller tributary markets, and therefore commands top-notch prices. There is another entirely different and far inferior variety masquerading under the same name. We have the genuine Simon-pure Klondike. Fine table berry when perfectly ripe.

Lady Corneille. Similar to Klondike and, like it, a great drought-resister. Regarded by many as a distinct improvement, even on that magnificent variety, and as the coming market berry.

Lady Thompson. Ranks with Klondike as a standard market berry.

Midseason Kinds

Haverland. A sure and enormous bearer, but berries are too soft for anything but home use or nearby market. It has also the habit of fruiting close to the ground and needs careful mulching. Pistillate, pollenize with any good staminate like Brandywine, Klondike, or Dunlop.

Largest and Handsomest Berries that Grow

Giant. Under this head we class several varieties that combine huge size, brilliant color, and the finest flavor. Will send the kind best suited to your locality. These plants are grown specially for gardens and home market growers.

3000 PLANTS BEAR \$368.00 WORTH FINE BERRIES

I am just doing this to accommodate my neighbors (orders \$28.60 worth of plants), as they have seen my patch of berries that I bought from you in 1924 and how well they have done. They want to try them. I sold \$368.00 worth of fine berries from the 3000 plants that I bought from you in 1924. Last year was the second crop and they are looking just fine this year.

Frank Berry, Lexington, Va., Mar. 26, 1927.

Klondike and Missionary are the Great Market Varieties.

Our Stock is Simon Pure. Write for Special Prices in Large Quantities

Late Strawberries

Aroma. Like Gandy, everywhere a standard late berry. Some pronounce it even ahead of Gandy and a heavier bearer and thriving in all kinds of soil and climates from Maine to Florida.

Gandy. Shares with Aroma the kingship of all the late kinds. A magnificent berry in all respects. Very large, of perfect shape, glorious color, excellent flavor; a standard large berry. Its firmness and meaty quality makes it not only a fine shipper but also fine to can and to preserve. Gandy thrives everywhere.

Chesapeake. Good late variety. Perfect flowering, with uniformly good-sized fruits. Because of the stout stems, the berries are very easily picked.

Next to the great standard varieties like Klondike, more money has been made on the very late kinds than on any others. They not only ripen after most kinds are gone and the market bare, but their large size, brilliant coloring and their first-rate flavor give them the command of the market.

STRAWBERRY PLANTS BY MAIL

Strawberry plants will be delivered by parcel post at the following rates. You can easily find out from your postmaster what zone you are in with reference to Kittrell, N. C., and then you can send postage according to the table below, unless you are ordering a collection of plants or trees which is delivered free.

A STATEMENT AS TO NEW VARIETIES

Our method of doing business, of cutting out and denouncing the tree agent, who as a rule, not only gets 50 to 75 per cent commission, but whose slick tongue often foists upon the public all sorts of worthless varieties of trees and plants, has made us many enemies. For, strange to say, most of the nursery stock of the country is still sold in that old before-the-flood way. The result of our attitude in this respect is that many of those old-method nurserymen, their agents and henchmen, attack us in all sorts of ways—openly, secretly, in the papers and out of them. They have been at it for forty years, but we have thriven by it, for the people to whom our method of selling direct has saved hundreds and thousands of dollars see through these attacks and stand by us.

This time we are being attacked because when we find a new or apparently new variety of fruit we pay more attention to its merits than to its antecedents. If we had given all the attention to the history and origin of the fruit and none to its quality it would have been all right, no matter how worthless it was or how much fraud and deception was practiced to sell it.

For Forty years and more we have kept keenly on the lookout for varieties of fruit that were better than those in common use. If on full trial one that we found or had sent to us proved good, we propagated and sold the plants or trees, paying little attention to their antecedents. In fact, that seemed to us a matter of little importance provided the fruit was good. If the fruit had a local name we adopted it; if none, we gave it one.

Among the varieties thus propagated are the Ellis & Hunt Everbearing Apples (Varieties that ripen continuously from June to August); the Summer and Fall Ambrosia Apple; the Wine, Ambrosia, Four-in-One and Neva-Myss Peach; the Giant and Never-Stop Strawberry; the Queen of Sheba Violet, etc.

We are not absolutely sure that all of them are new varieties. We are dead sure that they are good varieties. That is the main point, compared with which others are trifles. The Strawberries were propagated from single plants found in a neglected spot in an old orchard, where for years countless varieties have been tested; as none of them proved of unusual merit we had reason to believe that a plant of great value found among these orchard plants was a seedling and a new variety.

CONDITIONS OF SALE—Under our rigid system of marking trees, plants, etc., it is almost impossible for an error to occur. But, if it should, and the wrong variety of any fruit be sent, we will replace it free or refund the money on satisfactory proof of the error. But further than this we will not be responsible in any respect, and all stock is sold under that understanding and no other. Never-Stop Strawberry and Neva-Myss Peach are sold on the condition that the buyer will not sell or give away any trees, plants, or buds of either.

Modern Methods Quick Fruit Plant-Food

Gives You Fruit Quicker and More of It

Usually, though not always, large fruit-growers are able to get suitable manure or fertilizers, or at least something similar to it. Small growers, people who grow fruit to lessen the cost of living, to eke out a slender income, those who can least afford to blunder, have to put up with anything they can get, which is nearly always the wrong thing. Millions of dollars are wasted that way every year, and tens of thousands of people deprived of, or scantily supplied with, fruit who might have it in abundance.

After years of practical test we have compounded odorless, inoffensive plant-food, which any lady can handle as she would meal or flour, and which will greatly increase results.

The Plant-Food for Everbearing Strawberries and Raspberries is compounded to greatly increase the quantity and size of the fruit rather than to promote plant-growth. Plow or hoe in deeply half the plant-food before planting; hoe the remainder in lightly around plants the following spring. The Everbearing Strawberry, fruiting heavily through the heat and occasional drought of summer and fall, must not be so heavily manured as to cause "firing" of the foliage. If stable manure is used to enrich the soil before planting, it must be well rotted and deeply and thoroughly mixed with the soil. Best to use only the plant-food.

The Plant-Food for Fruit-Trees and Rose Bushes is highly concentrated (highly ammoniated) so as to promote rapid growth and bring the roses into full bloom the first year and the fruit trees into fruiting younger than ordinary fertilizing.

By using this food and planting, pruning, manuring, and cultivating as we direct, you get fruit about one year sooner than in the ordinary way.

You can easily prove this by comparing a young tree fertilized with our tree-food and one on which the same quantity of ordinary fertilizer is used. With fruit trees and rose bushes this plant-food puts in its work in rapid growth the first year and afterward must be supplemented with other manure as directed in book. (See label on plant-food and our book for full directions.) Do not understand by this clause that this tree-food increases all the fruit crops to come; that depends on future manuring and treatment of the tree.

Modern Methods Fruit Book

A book that no one who sets a fruit tree or plant can afford to be without. Embraces and puts in helpful form the practical fruit-growing experience of forty years.

Realizing the urgent need for quick results in this driving age, this book shows how to get these quick results. Other books tell; this book tells and shows. Pictures tell plainer than any words the whole interesting story of fruit-growing from the moment that the plant or tree arrives at your place till the ripe product is eaten or sold. It shows how to dig the hole for plant or tree, how to fill with soil, manure, and fertilize, how to prune the roots, how to prune the tops the first, second and third year, and how to give the final shape so that the sun can get in and give color and flavor to the fruit. It shows how to plant, manure, and prune a hedge to get perfect results before the first summer is half past. How to get perfect roses the first year and a fine shade tree in three to four years. It shows how to grow strawberries; how to plant, manure, cultivate and handle them, and all other kinds of small fruit. How to make an asparagus bed that will last a century and give a large supply of this delicious vegetable every year from April to August. Not only does it tell the big points but it tells and shows the countless little ones that other books do not, but on which success depends. No other book on growing fruits, ornamentals, etc., covering anything like the ground that this does, or covers it so thoroughly and plainly.

And not only does it give outdoor instructions, but it follows the fruit indoors and tells the lady of the house exactly what to do with it. A whole department is devoted to this subject. It tells how to serve all kinds of fruit. How to make all kinds of fruit ices and desserts. How to can, preserve, make jellies, jams, wines, cordials, and everything connected with the serving or preserving of fruit. Last, not least, it is all compressed into a compact 100-page book that can be carried in your pocket.

It Is Free With Every Order of \$5 or Over and With Collections on Pages 3, 5, 6, 14, 16, 17, 21, 41, and 45, If Asked For.

Neva-Myss The Earliest of All Peaches

THE ONLY ONE THAT HAS NEVER MISSED A CROP, FRUITED 19 YEARS. HAS PAID \$1,400 A SOLID ACRE.

(Price List on Pages 43-44.)

Of course, these are exceptional profits, but an average net profit of \$250 to \$400 an acre is within the reach of any live man living near a town or with fair shipping facilities.

There is large profit in the Neva-Myss because it ripens in May long before any other kind begins to turn, and creates a sensation in any market, big or little, or in any neighborhood it takes them by surprise by its earliness.

This effect is immensely increased by the fact that Neva-Myss stands clear outside the common run of early Peaches. They are small, pale and tasteless; Neva-Myss is a large, brilliant, red Peach of good quality.

Has paid \$1,400 a solid acre, and also has paid \$5.75 a tree at two years old, \$30 at four years.

There is sure profit in it because it never misses a crop. Fruited nineteen years, with only one light crop—1918—all others heavy—no dark mystery about this—simply plain everyday cause and effect. It is well known that most early Peaches have the habit of blooming late. They bloom much in a bunch—quick to come and quick to go. If frost hits them, no Peaches hit that year. Neva-Myss is the latest of all to begin blooming, but it has another safeguard that most of them are lacking in. Neva-Myss keeps at it gradually for weeks. Frost may come again and again, still there are enough blooms left to make a full crop. Indeed, occasionally, when no frost at all comes to thin them, it must be done by hand, if large Peaches are desired.

Neva-Myss, too, has in greater degree than most Peaches the habit of retaining for a long while the "shuck" or butt of the bloom. This dies, dries up and forms an effective overcoat, as it were, for the young Peaches.

There is quick profit in it because the trees usually begin to bear a year younger than most other kinds. Now there is no dark mystery here. A Neva-Myss at three years old usually fruits like a four-year-old-tree, simply because at three years old it is apt to be as large as most kinds at four years old.

Six Select Trees **With Modern Methods Plant-Food and Modern Methods Fruit Book, all delivered free for..... \$4.50**

Trees in all collections are the very pick of our immense stock, so perfectly balanced in root and branch growth that they will grow fast and come quickly into bearing. They are put into perfect shape before leaving us by being pruned root and branch precisely right, saving you all doubt and trouble in that respect. They are packed with extra care so as to arrive as fresh as when dug. With each collection is sent enough strongly concentrated (highly ammoniated) Modern Method Fruit Tree Food to push the trees into quick growth and fruiting. This food, combined with their superior vigor, brings them into bearing at two years old, a year younger than ordinary trees.

We also send our 100-page book, worth \$25 to any fruit-grower because it not only tells, but shows, by clear practical cuts, how to plant, prune, manure, and cultivate all kinds of fruit. Page 13 tells also about the book and fruit tree food. See pages 3 and 45 for collection of Peaches selected for their delicious flavor, ripening without a break from May to November.

AS TO BEING FROSTPROOF. Again some of our competitors attack us on this point claiming that there is no such thing as a frostproof Peach. We do not claim there is. We simply state that Neva-Myss has been fruited nineteen years and has never missed a crop, and we give the reason why. That it is a late and gradual bloomer, and that enough blooms always escape frost to make a fine crop.

See pages 15 and 41 for splendid success of Neva-Myss in ten states. See pages 16, 17, 18 and 19 for other varieties of Peaches. For other collections of fruit trees delivered free with tree-food and book, see pages 3, 5, 16, 17, 21 and 45.

My entire orchard of 123 trees were purchased from you and are certainly beautiful now, the first year they have really been in bearing. The Neva-Myss Peaches are especially good, as I can have them on the market as soon almost as the shipped peaches arrive. These trees grow in such good form, that they may almost be called self-pruning. The Everbearing Raspberries are certainly a money-making proposition, and we find them delicious for home use as well.

LYNTON BURR, Richmond, Va.,

Several years ago I ordered two of your extra early peach trees, Neva-Myss. They were so good that a year ago last fall I ordered two others. They have come into bearing this spring, bearing about a dozen or two peaches each.

JAMES DENTON, Somerset, Ky.,

16 Years' Success of the Great Neva-Myss Peach in 10 States

NEVA-MYSS \$7.00 BUSHEL

Mr. E. E. McLaughlin, Sesser, Ill.

Dear Sir: Your letter of inquiry with reference to the Neva-Myss Peach. I could write you an entire page on the true merits of this wonderful peach.

(1) Yes, sir, I can recommend the Neva-Myss as one of the very best of the early types. A sure cropper, comparatively immune to scale and other insect pest.

(2) A deep crimson, very attractive, sells at sight at high prices. I realize \$6.00 to \$7.00 per bushel in town at the fruit stands.

(3) They are semi-cling, ripening to the seed.

(4) Yes, sir, they grow to a good medium peach.

(5) Yes, sir, they are a rampant grower, easy to grow. I don't think I ever had one to die from transplanting.

I can recommend these people to you as being strictly reliable. They ship good size, uniform trees. Honest in all their dealings. If any mistakes should occur, they are ever ready to correct them and make all transactions satisfactory.

Now I am not interested in any way in this nursery, neither directly or indirectly. I am not related to any of these people by consanguinity nor affinity. I am not even personally acquainted with a member of their firm. I am not boosting their goods from any pecuniary interest, as they have no agents. They sell direct to the planter. Any further information I can render you I will gladly do so. Yours truly,

J. M. CAROTHERS.

I cannot say too much for the Neva-Myss Peach. Being a railroad man and not having any chances to look after them. I have about 15 trees: Been trimmed one time in 10 years. Not having any attention, they are full of wax. Sell about \$100 off of them every spring; give them away to any one that will come after them. I think they are something wonderful. They are the earliest peach in Warren County, I judge, by them selling so fast. They are gone when others are coming in. G. C. Rodenbaugh, Vicksburg, Miss.

Neva-Myss trees began to bear this year. They are ahead in ripening, appearance, and quality to Mayflower which is also fruited here. J. R. Osborne, Shelby, N. C.

I found the tree a vigorous, healthy grower, and the second year I sold \$5.75 worth of Peaches. During the three years I've fruited this Peach, it has never failed to have a heavy crop, owing to its late blooming, which enables it to escape the late frosts and blizzards that are so common here (summit of Alleghenies). During the time a sleet came as the tree was dropping the bloom and still I had a full crop. A. T. Keister, Blacksburg, Va.

My Neva-Myss Peaches have never failed to bear a big crop each year. I had ripe Peaches last year on my Neva-Myss trees on the 10th day of May. E. P. Harris, North Birmingham, Ala.

I have been growing your Neva-Myss Peaches for five years and during this time they have not failed to have a full crop, and I have had the first peaches I have seen in Augusta every year. In my opinion, they are the very best and surest peach known. B. W. Brawner, Augusta Ga.

All that you say about Neva-Myss Peach (so far as my experience has gone) has proven true. I had four other varieties of Peaches set out about same time as were the Neva-Myss. All bloomed this spring, and most of them fruited more or less, but the Neva-Myss were the only ones that held and developed their fruit. The Neva-Myss was the latest of the five varieties to bloom. They are certainly beauties, and get their color eight or ten days before they are ripe. You certainly cannot recommend the Neva-Myss Peach too highly. J. W. Belknap, Palacolis, Texas.

Send 12 Neva-Myss Peach Trees. The Neva-Myss Trees I set out last spring are doing fine and I think they will bear this year. W. M. Adamson, Brownsville, Penna. March 12, 1927.

I have two of the Neva-Myss and one Four-in-One in my yard and they are fine. F. H. Jordan, Purvis, Miss. February 5, 1927.

I have talked with Judge Denton of Somerset and he told me the Neva-Myss was all you claimed for it; that is why I am thinking of getting a few more. T. C. Duke, Somerset, Ky. September 9, 1926.

I got a Neva-Myss Peach Tree of you last spring for testing and it has grown so rapidly that I am enclosing check for \$4.50 for six select trees—Neva-Myss. W. G. Bradford, Augusta, Ky. November 1, 1926.

Union City, Tenn., Feb. 5, 1925.

The Neva-Myss tree I got from you two years ago was full of fine fruit this year. Other trees are doing fine. John T. Pairo, Greenville, N. C. October 25, 1926.

The Neva-Myss Peach Trees I bought from you more than ten years ago have never missed a crop. Mrs. J. B. Ashton, Columbia, Tenn. November 27, 1926.

I must congratulate you on the Neva-Myss Peach. Some few years ago I purchased of you a few and today the nice fruit is on them and have never failed to bear when all other trees was a total failure. Porter Feathers, Whitesburg, Tenn., June 21, 1926.

I want four or five hundred Neva-Myss Peach trees. Will ask you to quote me prices on same. The trees I bought from you last spring are looking fine. Geo. Edrington, Osceola, Ark.

I have been raising some of your Neva-Myss Peaches several years, but I have lost some of my trees. Please make me price on a dozen of your trees. Your Neva-Myss is a few days earlier than the Mayflower and I have a lot of those. L. F. Williams, Tuscaloosa, Ala. November 30, 1927.

Have planted your Neva-Myss Peaches when I lived in Macon and they were each year the wonder and admiration of all who saw them. That is what affords me a large part of the pleasure I get out of raising them. And I have always told my friends the only way to succeed in having such fine fruit was to buy from you. Harry C. Tindall, Atlanta, Ga.

I want to say in regard to your Neva-Myss Peaches that they are about as heavy bearers as I have ever seen. They have a good color and very good flavor for an early peach. If they set a crop as regularly as they have done in the last two or three years they should be a great peach for the early market in this section. Jno. R. Hutcheson, Blacksburg, Va.

The Neva-Myss Peaches that I bought of you four years ago had a fine crop last year and they were fine beyond expectation and I am ready to state that I have been more than pleased with them and I will in this letter place an order for more. Chas. Buehler, Vincennes, Ind.

Some years ago I had you send some Neva-Myss Peach trees to a kinsman of mine (P. K. Goree), at Midway, Madison Co., Texas. They have never missed. He tells me they were heavily laden with splendid ripe Peaches on May 7. They are beautiful trees. Judge Norman G. Kittrell, Sr., Houston, Texas.

I had some wonderful Neva-Myss this season, three that weighed 17 ounces. I fixed up two dozen specially in a box and got \$2 for them. One of the oldest produce merchants here says my Peaches (yours) have the best flavor of any early Peaches he has ever seen on this market. A. S. Willy, Mobile, Ala.

I find that your Neva-Myss Peach ripens about eight or ten days earlier than Mayflower. It proves so in my orchard. G. W. Miller, Gilbert, S. C.

Bought a few Neva-Myss from you a few years ago and had peaches early as May 5th on one of the trees. J. W. Sparranberger, Selma, Ala.

Specialty Peach Trees

(Price List on Pages 43 and 44.)

Peaches not only make the daintiest of desserts, Peaches and cream, ice cream, preserves, jellies, etc., but they are the leading canning fruit. Peaches that are not sold or consumed fresh can be turned into money by canning.

It is generally conceded that the Peach is not only the most beautiful, the most delicious, but also the most wholesome of all tree fruits. Why not enjoy it from May to November, including both months. It is perfectly practicable to do so. See page 3 for trees delivered free with book and tree food.

The Giant Four-in-One Peach

This is far and away the largest Peach that grows. It is the firmest of all mid-summer Peaches. Its grand size and glorious coloring makes it certainly one of the very handsomest, while when fully ripe and soft it has no superior and few equals in delicious flavor. It colors up deep cream and crimson long before it softens. This adds immensely to its value as a shipping and market Peach, for it can be gathered when well high firm as a cannon ball, shipped 2,000 miles to market, and softens at leisure. Then its veritable nectar, clear seed, soft, juicy, melting—all that a perfect Peach can be, and is fully entitled to the name it bears, as it would be from another point of view, to wit: the best seller, the best eater, the best canner, the best preserver. In fact, it is king of all mid-season varieties, just as Neva-Myss is of all the extra early sorts, and like it, it is a quick grower and enormous bearer.

6 Trees Delivered with Plant-food and Book, for.....\$4.00

Insurance Policy with them. See page 3.

Exquisitely Flavored Table Peaches

The following superb varieties of soft, clear seed Peaches are for home use or strictly fancy market. Their exquisite flavor fits them for Peaches and cream, ice cream, or they are delicious eaten right from the tree.

Ambrosia (Food of the Gods) ripens in early July, Niagara in late July, and Wine Peach in August, while Neva-Myss and Four-in-One color up long before ripe and are usually picked and shipped to market in this stage of ripeness. If allowed to ripen thoroughly on the tree, they rank well up with the fine table Peaches.

Ellis November

This is the only Peach we have ever seen that really ripens in November. It is a free-stone and a Peach of medium size and of splendid flavor. It is a seedling found in this neighborhood and we have been watching it for years. It is freer from disease than any variety we have seen and the beauty of it that it matures fruit and it has not missed a crop for four years we know. We highly recommend this variety for home use or for home market. (See cover page for a picture of this splendid variety.)

Ambrosia (Food of the Gods)

The most exquisitely delicious Peach yet produced. Clear seed, soft and melting. A revelation in Peach flavor. A heavy and sure bearer, ripening in July. Color beautiful cream and crimson. So delicious that it can be eaten with cream without sugar, making it wholesome for even the weakest stomach.

Niagara

An immensely large, brilliantly colored, exquisitely flavored Peach of the Elberta type, but much earlier and far superior to it in quality. It seems certain that Niagara will take the lead of the class of the strictly fancy Peaches, for it is in size, color, and productiveness not surpassed by any of them and not approached in flavor by the best of the giant Peaches. Ripens in early August.

Wine Peach

A beautiful red-cheeked, medium-sized Peach of the most delicious flavor. Clear seed, soft, so luscious that it can be drunk like a glass of wine, which it resembles in flavor. It has the almost unique habit of propagating true from the seed. You can grow all the trees you want by simply planting the seed. Has been grown here from seed for fifty years and has never missed a crop. This gives a rare and distinct value to the Wine Peach.

6 Trees Of Neva-Myss, Four-in-One, Ellis November, Ambrosia, Niagara, or Wine, selected as you please, delivered free with plant-food and book. (Insured See page 3.)..... **\$4.00**

Extra-Early Peaches

(Following the Neva-Myss)

(For Price of Following Trees see Page 44.)

Mayflower. An early peach—ripening before Sneed.

Sneed. This is recognized as one of the standard early Peaches over the whole country. It follows Neva-Myss closely, ripening early in June. It is of good size and is unusually productive; a fairly well-colored Peach, which is so luscious that when ripe it can be drunk like an orange.

Arp Beauty. An early Peach of good quality.

Alexander. An early Peach. Popular in some sections.

Greensboro. This is a glorious mid-June Peach. In size it ranks among the very largest. Its color is an exquisite cream and crimson and in quality is luscious and melting. Succeeds generally throughout the country and as far south as the Gulf of Mexico.

Dewey. This is a large, exceedingly handsome, red and yellow soft Peach. The trees are fine growers and heavy bearers. It is one of the few really fine varieties that succeeds generally throughout the country and in Florida, where it thrives well, except in the extreme southern part. Follows Sneed closely in time of ripening.

Early Peaches

Carman. A very large, brilliant red Peach of excellent quality and immense productiveness. Soft and nearly freestone when ripe. Equally good for home and market, being firm and a fine shipper. Does splendidly throughout the country clear down to the Gulf of Mexico. Ripens in June.

Belle of Georgia. Another of the great cream and crimson Peaches. An exceedingly showy Peach and a good one, too. An excellent shipper, firm and a good carrier, though a freestone, and soft and luscious when thoroughly ripe. Succeeds generally throughout the country down to the Gulf. Early in July.

Burke. A mammoth, superb, white and red Peach of showy appearance and good quality. Late July and early August. Clingstone.

Chinese Cling. A large white Peach shaded with red; fine quality. Late July.

Stonewall Jackson Cling. Similar to Chinese Cling, of which it is a seedling, but a decided improvement on it. A really magnificent Peach. Last of July.

Early Elberta. Type of this grand variety ripening in June.

Midsummer Peaches

Elberta. Easily king of its ripening season. A mammoth gold and crimson Peach of excellent flavor. Famous for its vigorous growth, immense productiveness, and adaptability to all soils and climates. Great for home use, for market, and for all purposes. Thrives generally, and even as far south as Florida. Freestone. August 1.

CAUTION.—There are two, if not three or four varieties, differing greatly in merit, called Elberta. We have the genuine Elberta, on which so many millions have been made by the Georgia growers.

J. H. Hale. A fine peach of good shipping qualities.

New Prolific. Similar to Elberta, and one week later. Valuable to keep up the succession of Peaches. Freestone.

Crawford's Late. Another splendid red and yellow Peach. A trifle later in ripening than Globe. Freestone. Does well even as far south as Florida.

Stonewall Jackson's Free. Said to have originated from a seed brought by a Confederate soldier from the Gettysburg campaign in 1863. A giant gold and crimson Peach of excellent quality. Noted as being a sure bearer. Valuable. Late August.

Old Mixon Free. A large, white and red, soft Peach of fine quality. Late August.

Matthew's Beauty. Another excellent red and yellow Peach. Freestone. Last of August.

Honey. So many of our customers ask for the old-fashioned Honey Peach we decided to put it in stock. It is a freestone, medium sized peach. We have the genuine old-fashioned Honey.

Indian Freestone. An old-time favorite wherever planted and grows to a large size; dark red flesh; a deep red; highly flavored.

Fall Peaches

White Heath. A large, white, clingstone Peach of excellent eating, canning, preserving, and selling qualities. First half of September.

Eaton's Gold. A very large, finely flavored, gold and crimson Peach. Valuable for all purposes. Said to have originated here from seed sent from Japan before the war, about 1855. Clingstone. Last half of September.

Durham or Flinton's October. A magnificent, late, white Peach. Considered far superior to even the Standard White Heath.

Albright's October. A large, white, well-flavored Peach for any season, doubly valuable because it ripens so late. Clingstone. First half of October.

Stinson's October. A standard very late Peach.

Peaches All Year

Before you decide which of these varieties you wish to grow, turn to pages 3 and 45 and see if our great Peach collection would not be the best thing for your home garden. Look also at the pictures of Peaches on the cover. The twelve kinds we offer will furnish the table with fruit all season long; you'll have plenty left to can and preserve, or to sell.

The professional fruit-grower prefers to grow only four or five varieties, as they will furnish a complete picking season and keep a band of men busy from the beginning until the end of the season. The home grower, however, wants trees which are always ripening throughout the season. We think our Peach collection on pages 3 and 45 suits the home-garden better than anything else you might select.

Apple Trees

HAVE APPLES THE YEAR ROUND FROM YOUR OWN TREES. ALL-THE-YEAR-ROUND COLLECTION OF TREES DELIVERED FREE WITH TREE FOOD AND BOOK. SEE PAGE 5.

By intelligent people the Apple is now deemed almost as indispensable an article of food as bread itself. It is food, medicine, and no mean moral agent all in one. Indigestion, bladder and kidney trouble, and rheumatism, which has its chief seat in such troubles, are benefited and often cured by the liberal eating of Apples. People, especially boys, who eat Apples freely do not have the same hankering for dope, drink, and tobacco as the non-fruit eaters.

The only way for the average family to have Apples is to grow them themselves. One good tree of the right variety will yield more fruit than can be bought for \$10. We furnish trees of varieties that ripen in succession from May to November. With a little care Apples can be kept through the winter till Apples come again. A cellar is best, but almost any dark, dry place will do, the cooler the better, so the Apples cannot freeze.

Any surplus of Apples can easily be sold if kept until winter. Still, it is often the case that summer and fall Apples sell well right from the tree if fine.

Thus, Summer Ambrosia would sell on sight, at any time, and if not then, surely by taste. Few people, if allowed to see its exquisite beauty and taste its delicious flavor, could resist it.

Then what a friend the Apple is to the housekeeper. The fresh Apple, of course, comes first, but then dried Apples, canned Apples, Apple marmalade and Apple butter stand her in good stead. Then there's Apple vinegar. One tree of Apples will yield many gallons, and there is really a crying demand for pure vinegar. For not even the shadow of an Apple ever fell in most of the vinegar we use, and we know it.

Apple Aristocracy

(Price List on Pages 43 and 44.)

The following are the creme de la creme (cream of the cream) of Appledom, which thirty years' tests have enabled us to select as the very best varieties of the Apple family.

Summer Ambrosia. A medium-sized, golden-flecked red Apple of the most excellent flavor. Till you have eaten one of these strains of Ambrosia you can have no idea of what a really tip-top Apple can be. Ripens in August when apples are scarce.

Fall Ambrosia. Superior in flavor even to the Early Ambrosia—that is, if such a thing were possible. Very large, brilliant red. Ripens in the fall and keeps all winter.

Dixie. A superb fall and winter Apple for the South. Originated there, and will therefore succeed much farther south than any other Apple.

Ellis Everbearing. An excellent, large, yellow Apple that ripens from June to September.

Early Colton. Valuable because it ripens far ahead of all other Apples of any value. A large, handsome, well-flavored Apple, ripening in Early June into a veritable ball of gold.

Hunt's Everbearing. A medium-sized Apple of most delicious flavor, ripening all through June, July and August.

SIX TREES of any of above kinds, delivered free **\$4.00**
with plant-food and book.....

This Collection Carries Insurance Policy. (See Page 3.)

General List of Apple Trees

(See Pages 43 and 44 for Prices of Following Trees.)

SPRING AND SUMMER APPLES

Yellow Transparent. This is a very fine Apple indeed; good quality, good size, beautiful, with a yellow tint; a sure and heavy bearer. A really delicious Apple. Ripens in June.

Red June. Famous for its striking beauty and also for its sprightliness of flavor. With a coat of flaming red and meat of purest white it is one of the best known and the most popular of Apples. A good bearer, and though only of medium size, a very valuable Apple for home use or to sell. Ripens in June.

Early Harvest. A widely known standard early Apple, valuable for its large size, excellent flavor, and is a sure and heavy bearer. Fruit is pale yellow, streaked with dull red. Time of ripening, June. Early Harvest is universally popular.

Summer Pearmain. One of the most popular summer Apples. Ripens in July.

Horse. A large, old Apple, famous for its fitness for cider, pies, drying, and for all culinary purposes. When allowed to mellow to deepest gold, it is a delicious eating Apple. We have the genuine old-time Horse Apple of our daddies' and granddaddies. Ripens in August.

OUR GUARANTEE

The broad guarantee given on page 42. It is, we believe, the broadest guarantee given by any nursery in the country.

Every tree, plant, shrub, bush, etc., etc., offered by us is strictly first class and is guaranteed to satisfy the purchaser. Note the

General List of Apple Trees Continued

May. Small round; pale yellow. One of the earliest apples and very popular on account of its earliness.

Early Joe. One of the best summer apples ripening in July. Medium size; streaked with red.

Fall Apples

Magnum Bonum. (Great Good) The standard fall Apple. Famous everywhere for its immense productiveness and unequalled flavor. Really a most excellent and valuable Apple. In size it is medium, and in looks nothing extraordinary, but its quality leaves nothing to ask for. King of its season, which is late September.

Grimes Golden. A large, golden yellow Apple for exquisite flavor, ripening in October. A heavy bearer, and in all respects an Apple of genuine value, and of the very best of its season.

Late Fall and Winter Apples

Winesap. Named for its delicious, sprightly, winey flavor. A standard fall and winter Apple, universally popular, known to everybody and liked by everybody. In fact Winesap has everything in its favor—name, flavor, appearance, and productiveness. Winesap is an immense and never-failing bearer of large, flaming, red Apples, which color up months before they ripen, making the tree a most striking and ornamental sight through the whole summer and fall. No one can go amiss when he plants Winesap. It keeps all winter.

Stayman Winesap. A seedling of the famous old standard Winesap. Similar to it in many respects. A heavy and sure bearer, and a fine keeper. Thrives in all soils and climate, like Winesap. Every orchard should contain some Stayman trees. The fine flavor and beautiful appearance of this Apple makes it a good seller, and no variety could surpass it for home use. Keeps till Apples come again.

York Imperial. Also called Johnson's Fine Winter. A very large, round flattish, whitish Apple, speckled with red. Meat yellowish and of excellent flavor. Keeps till Apples come again.

Mammoth Black Twig. Also called Arkansas Black. Said to be a seedling of Winesap, which it resembles in appearance and flavor. A very large, blackish red Apple of first-rate flavor. Ranks with those fall kings, Winesap, Stayman and York Imperial, as surpassing all others, as they do, in the few essentials of a first-class fall and winter Apple; productiveness, flavor, beauty and "keepingness," if we may be allowed to coin a much-needed word.

Red Limbertwig. A very large, pale-yellow Apple, sprinkled with red. Flavor, rich, juicy, and equal to the very best. A very fine Apple, keeping all winter.

Yates. A small, red, winter Apple, famous as a keeper and for its delicious flavor.

Royal Limbertwig. Very large Apple; pale yellow, striped with red and a very popular winter apple.

Russet. The old-fashioned Russet apple. We grow it as so many of our customers remember the old Russet and want a few of these.

Delicious. A variety too well known to need description. Extra fine.

Crab Apples

Siberian Crab. Fruit in clusters with long stems. Makes the best and most beautiful preserves.

Champagne Cider Crab. Makes delicious cider as well as preserves. We consider it one of the best crabs on the market, and it is a variety we introduced.

Hyslop. Fruit large for its class. Grows in clusters. Color dark rich red. Good for preserving and for cider.

Transcendent. A splendid and popular crab. Red striped.

COUNTY DEMONSTRATOR PRONOUNCES TREES FINEST EVER SEEN

I thank you for prompt attention and wish to say the trees I have gotten from you are very satisfactory indeed. I had the County Demonstrator prune my trees a few days ago and he says they are the finest year-old trees he has seen anywhere.

R. S. Lipscomb, Gaffney, S. C., Jan. 26th, 1927.

Cherry Trees

THE COMBINATION TREE—FRUIT AND SHADE

Few trees combine the useful and ornamental in as large degree as the Cherry. They make an exceedingly handsome shade tree, worthy of a place in every yard or lawn. Or they can be grown in any spare or waste space or corner, no matter how rough and stony, needing no cultivation after the first two or three years, and they are very long lived.

(Price List on Pages 43 and 44.)

Early Purple.

A large, luscious Cherry, rich purple in color. Ripens here at the very beginning of May with the earliest strawberries. Its fine flavor makes it valuable for home use, and its size and earliness for market.

Black Tartarian.

Another splendid, large black Cherry of same habit as Early Purple. Ripens in May. A standard Cherry, most uniformly successful of all.

Governor Wood. A very handsome, large yellow Cherry of sweet, delicious flavor.

Short-Stem May. An old standard variety whose fine quality and unsurpassed productiveness makes it immediately popular.

Rockport. A fine, red Cherry of first-rate quality, belonging to the same class as the preceding varieties.

May Duke. A very fine, large, dark red Cherry that succeeds and bears heavily over a wide region.

Early Richmond. A fine, large Cherry of brilliant red color.

English Morello. An improvement on the popular old Morello.

Yellow Spanish. Large; Pale Yellow, with light red cheek; firm and delicious.

Everbearing Mulberry Trees

These trees are exceedingly rapid growers and come into heavy bearing in three or four years. Then for months they continue to ripen large quantities of fine, large fruit, good to eat and of the highest value for poultry and hogs, which can be penned around trees and kept fat and healthy. No raisers of chickens or poultry of any kind can afford to be without them if they cost \$5 a tree.

This valuable tree should be planted where hogs or poultry can be penned under them. They do well anywhere, being exceedingly hardy. They will thrive in low places near streams, where water can be penned with them for the pigs and poultry.

OUR GUARANTEE

broad guarantee given on page 42. It is, we believe, the broadest guarantee given by any nursery in the country.

Every tree, plant, shrub, bush, etc., etc., offered by us is strictly first class and is guaranteed to satisfy the purchaser. Note the

Japanese Plums

(Price List on Pages 43 and 44.)

This magnificent Plum is a genuine revelation to a person who has never seen it. Its large size, exquisitely beautiful coloring, and immense productiveness is astonishing. At fruiting time the trees are simply piles of flaming, red plums. The delicious flavor and wholesomeness of the fruit is as striking as its qualities. It is entirely free from the unwholesome qualities of the common wild Plums. Children and invalids eat the best sweet varieties not only with safety but positive benefit. After testing all varieties in our trial orchard, we have selected the following as the finest and best of this glorious family. Fine Plums, like fine peaches, sell well at home or on the large market. The trees are beautiful ornaments for yard or garden.

Red June. The earliest of the Japan group of plums, ripening in June. Size very large, color flaming red, quality very good. A sure and exceedingly heavy bearer. Valuable for home use or market on account of its earliness, beauty, and general excellence.

Kelsey. A splendid Plum. Very large. Color, greenish-yellow, some times flushed with red. An excellent variety.

Mammoth Gold. Another yellow Plum and a very fine one.

Omaha. A splendid new Plum.

Abundance. Very large and of indescribable beauty. Closely follows Red June in ripening, and remains in bearing a long time. Rightly named for its immense productiveness. Quality probably equal to any fruit that grows. Begins to bear on good soil at two years old, and rarely or never fails to produce a large crop of the finest fruit.

Climax. A cross between Japan and our native Plums, originated by Luther Burbank. Climax ripens soon after Red June. In size, in magnificent coloring, in enormous, amazing productiveness, and in exquisite flavor, it ranks with the best.

Ogan. One of the finest of these splendid Plums. Almost as large as a peach, and as delicious as any apricot you ever tasted.

Wickson. Cross between the Japanese Plum and our native Plum. Noted also for the beauty of its tree growth and fruit and for the excellence of its immense crop of fruit. Ripens soon after Abundance.

Apple Plum. Resembles an apple in appearance. A very large Plum of excellent flavor. Ripens in July.

Hale. A very large and yellow Plum with a peach flavor. Early August.

Chabot. Another large, red and yellow Plum of good quality. Ripens in late August.

Wild Goose. A large, purple-red Plum of native origin. Well known for its productiveness and good-eating qualities. Early June.

Shropshire Damson. The finest and most productive of all the Damson family. Grown chiefly for preserving, for which it is unequaled.

APRICOT

Early Golden. A very fine, deep yellow Apricot.

SQUARE DEAL BRINGS US MORE CUSTOMERS

I have taken the liberty of recommending your concern to my friends, as the concern is way above the average in fair treatment.

S. S. Sollee Piano Co., Savannah, Ga., Feb. 1, 1927.

OUR PLANTS BEAR TWO MONTHS AFTER PLANTING

I duly received your shipment of 500 Klondike Strawberry plants and had them all put out yesterday afternoon. I found the plants exceptionally good and fine and want to thank you for your care in their selection and the nice way in which they were shipped. I trust I will be as successful with them as I was with your shipment of 500 Gandy Strawberry plants to me last March, which I put out on the 15th of March, every plant living, and began gathering berries from them on the 15th of May following.

T. E. Ryals, Macon, Ga., Nov. 30, 1926.

WHAT A 25-YEAR CUSTOMER HAS TO SAY

I am enclosing my check for \$25.00 to pay for the peach trees. If these are as good as the thousand I got from you about twenty-five years ago, we will be delighted and you may expect another good order.

J. W. Abercrombie, Montgomery, Ala., Jan. 31, 1927.

SHADE AND DOLLARS FROM THE SAME TREE

A TYPICAL FIVE-YEAR-OLD PECAN TREE

This illustration shows a five-year-old tree which was photographed in our own orchard. It was then fifteen feet tall and it bore ten pounds of large nuts which were worth at that time fifty cents a pound. (Now they are much more valuable.)

Paper-Shell Pecan Trees

(Price List on Pages 43 and 44)

The demand for this splendid nut is increasing faster than the supply. Trees thrive in any soil and climate that cotton does. Set 50 feet apart each way, 20 to the acre, with a peach tree between each way, 100 to the acre, profit will begin in two years and rapidly increase. In four years Pecans will begin to pay and in eight years peach trees, after paying all expenses and leaving handsome profit, can be cut off. We recommend the Stuart Pecan as best.

Pecan tree sent with taproot cut back so as to force branching, as recommended by successful growers.

DIRECTIONS FOR HANDLING AND TRANSPLANTING PECANS

Take great care in preventing the roots of trees from becoming dry by being exposed to the weather. Keep the roots moist and covered at all times. When taking the trees to the field for setting they must be carefully covered with moss, wet sacks or something similar, to protect them from drying out. This is important. Only one tree should be removed at a time, and this set at once in the hole previously dug. The hole must be at least two feet wide and of proper depth. Cut off the ends of all bruised or broken roots. Use a sharp knife for this; do not use an axe or hatchet. It has been practically demonstrated that it is advisable to cut off part of the taproot, as this causes the roots to throw out laterals. This will allow the tree to receive food, and at the same time affords it a firmer hold upon the land. Place the tree in the hole about two inches deeper than it originally stood in the nursery row; fill the hole about half full with well pulverized top soil in which there is a proper proportion of well-rotted stable manure. If this is not available, use the proper amount of high-grade fertilizer or bone meal. This must also be thoroughly mixed with the soil.

Pack the earth well about the roots of the trees, the firmer the better. Fill up the hole and pack the dirt well, but leave at least two inches of loose soil on top. If the soil is very dry, some water should be poured about the tree when the hole is partly filled. When the trees are more than four to five feet in height, the top should be cut back within four feet of the ground. Do this after the tree is planted. Be careful not to break the eyes off the tree in handling. Keep them well cultivated and properly pruned.

Schley. A large nut and a very early and prolific bearer.

Delmas. Medium to large; $1\frac{1}{2}$ to 1½ inches long; oblong slightly flattened; shell thin; plump, rich flavor; good grower; one of the best.

Stuart. Nut large to very large; $1\frac{3}{4}$ to 2½ inches long; oblong; shell medium thickness, and of very good cracking quality; kernel full, plump, of best quality; flavor rich and sweet; a good grower; heavy bearer; excellent.

Van Deman. Nut large to very large; large foliage.

A Few of the Thousands of Testimonials on Our Files

OUR BROAD GUARANTEE REVIVES ONE'S FAITH IN HUMANITY.

Your letter of the 31st received yesterday. I assure you that it is a great pleasure to know your firm and to recommend it to others. The world stands today in regard to honesty and the fulfilling of pledges and guarantees, it is refreshing and satisfying to find one firm that really means just what it says. Indeed, it revives one's faith in humanity to find a firm like yours that is thoroughly honest. My husband and I have bought from a dozen nurseries, but yours is the first to stand by its guarantee. Only last week a large nursery refused to replace trees we ordered after guaranteeing to do so.—Mrs. Jno. Willard Martin, Hurtsboro, Ala., November 5, 1926.

OUR LANDSCAPE DEPARTMENT GIVES ENTIRE SATISFACTION.

Several days ago I wrote you asking you if you would help design and plant shrubs sold by you. Several years ago I bought some plants from you and they have been a nice through the years that I am anxious for you to help me plant the grounds around the church and parsonage here.—Mrs. Wm. L. Knight, Weldon, N. C., March 1, 1926.

NICEST STOCK EVER BOUGHT. TICKLED TO THE BONE.

I received the trees and plants O. K., and sure we can't express our appreciation. They are the nicest I ever bought. I am so well pleased that I am sending for a few more plants or shrubbery. Our neighbors tell me that our trees are the largest they ever saw, and I am just tickled to the bone.—H. N. McKee, Apex, N. C., March 17, 1926.

OUR MODERN METHOD TREES WITHSTAND SEVERE DROUGHT.

About a year ago I bought an order of fruit trees and strawberry plants and rose bushes from you, and having received catalogue (fall) from you, I am writing to say that all of the stuff that I bought from you have given splendid results and we are very much gratified with what they have done this year. You know, of course, that we have had an exceptionally dry summer, probably the hardest season that plants and trees have had to endure for the past 80 years. All of the trees we received from you and planted, with the exception of one Scuppernon Vine, have grown and done well.—John S. Taylor, Greenville, S. C., October 16, 1925.

ONE RED JUNE PLUM NETS \$15

I have one of your Red June Plum trees in my back yard, from which I sold about \$15 worth to one fruit stand and gave away about a bushel besides.—Lloyd Summerville, Charlotte, N. C., November 13, 1925.

PECAN TREES EXTRA FINE. DUPLICATES ORDER.

We received the second shipment of Pecan trees today, but did not intend to order but one. The regular form requisition-purchase order was intended to cover the hurried order first sent you. They are so fine, however, we are going to find a place to put them and are enclosing regular requisition covering this second shipment.—F. B. McKinn, Purchasing Officer, State Hospital at Goldsboro, N. C., December 14, 1925.

Pear Trees

(Price List on Pages 43 and 44.)

FOR CHOICE COLLECTION OF PEAR TREES DELIVERED FREE, WITH TREE FOOD AND BOOK. SEE PAGE 5.

Early Harvest. A large, yellow, pink-cheeked Pear of good quality. Exceedingly handsome variety in both tree and fruit. Ripens early in June. The extreme earliness, far ahead of all other kinds, gives it a high value for home use and for market.

Koonce. Similar to the Early Harvest. A very fine Pear. Ripens in June.

Early Green Sugar. A small green Pear of excellent flavor. Very productive, and said never to fail. Ripens in July.

Bartlett. A magnificent, large, juicy yellow Pear. Easily King of all August Pears. A variety of very high value indeed that should be planted in every orchard and in every home garden.

Seckel. A small, brown, russet-red Pear, popular for its sweet flavor. Ripens in late August.

Japan Golden Russet. An extra-fine variety for home use and market sales.

Le Conte. Strikingly beautiful in tree and fruit. Immensely productive of very large, yellow Pears of fine quality. September. Most universally successful of all Pears except Kieffer.

Garber. Of Oriental origin, like Le Conte and Kieffer, and like them, amazingly productive. A large, yellow, pink-cheeked Pear of excellent flavor, rich, juicy and luscious. Ripens late September.

Kieffer. The largest, handsomest, and most productive of all Pears. A huge lump of gold, brilliantly tinted red when ripe. Ripens in late October and November and keeps well all winter. Trees easy to live, quick to grow off, and early to bear. We know single trees of Kieffer that bear over ten bushels year after year without ever failing. Good quality when thoroughly ripe. This superb fruit, the king of all late Pears, has been discovered to have one immense advantage over all other Pears, and indeed of most other fruit—the tree is proof against San Jose scale.

Grapes

(Price List on Pages 43 and 44.)

Scuppernong. The most wonderful of all the Grape family. In lusciousness of flavor not surpassed, and hardly equaled by any Grape or fruit that grows. Immediately prolific, and needing no attention after the first two or three years except to provide a frame or arbor for the rapidly spreading vines to grow on and be supported. There is scarcely any limit to the age to which it lives, or to the quantity of Grapes a vine will bear. The original vine found on Roanoke Island, N. C., by the first English settlers on this continent is said yet to thrive and bear. I have seen single vines that I am sure were loaded with over twenty-five bushels at one time.

Thomas (Scuppernong Family.) Dark reddish purple. Fruit is sweet and tender.

Mish (Scuppernong Family).

Black. Medium - sized berries, which are delicious, rich and of splendid flavor.

Flowers (Scuppernong Family).

Black. Bunches have from fifteen to twenty-five berries, which are of delicious sweet flavor. Ripe about October 1, approximately a month later than Scuppernong.

James. A black Scuppernong, but larger, and by some considered even more luscious and better in all respects. Similar in growth and fully as heavy a bearer. As good for wine as for the table. Both of these Grapes seem immune from all diseases. Even in damp low places they thrive wonderfully. Both make excellent wine.

Bunch Grape-Vines

The Grape-vines take up such little room and yield such a heavy crop of the most delicious and wholesome fruit that no garden should be without them. They can be planted along the fence or on each side of the garden walk. If so planted and trained over the walk in a trellis they bear heavily, the Grape-vines completely roofing the leafy arch.

The bunch Grape is noted the world over, not only for its deliciousness, but also for its wonderful wholesomeness. People who can eat no other fruit, except perhaps the peach and Never-Stop Strawberry, eat Grapes, not only without harm, but often with benefit to their health. In fact, the Grape cure is a well-recognized system of dietetics in some countries.

Moore's Early. A large dark, purple, very early Grape of excellent quality. In fact, we find it to be the very earliest good and most reliable Grape that we have ever seen; prolific bearer; succeeds everywhere.

Concord. A fine, purple Grape, closely following Moore's Early, and giving a succession of Grapes for a long while. Concord is an immense bearer of most excellent and wholesome fruit. Great also for wine. A standard Grape everywhere.

Delaware. A small red Grape, but borne in large bunches. Famous for its delicate flavor and as a dessert Grape.

Niagara. The best, most popular and most generally successful white Grapes. A truly excellent variety.

Ives. Clusters and berries are of medium size; dark purple; sweet and pulpy, with some foxiness. Should hang on the vines a while after coloring.

Catawba. An excellent table and wine Grape with large, round berries, rather closely set in clusters of good size; when fully ripe they are a dark copper-color, with a sweet, rich musky flavor.

Worden. A seedling of Concord, but larger in bunch and berry, of better flavor, earlier, as hardy and healthy in every way, producing fine crops that command good prices. A superior Grape that deserves to be a market leader.

GRAPES—Continued

Campbell's Early. Black. Clusters and berries large; flavor quite sweet and rich. A good keeper and one of the best early varieties.

Moore's Diamond. Yellowish white tinted with yellow when ripe. Large bunches; berries set close together on long stem. Vines are hardy, vigorous, and produce abundantly.

Wyoming Red. Hardy, early, productive, good sized in bunch and berry; brisk, sweet flavor.

Isabella. Color black. Vine strong grower, large bunches. Midseason.

Lindley. Midseason. Quality exceptionally good. Vine hardy. Fruit red.

Agawan. Fruit purplish red, large, rich and sweet; keeps well; vine vigorous. Ripens soon after Concord.

Pocklington. Clusters large, berries yellowish green, flavor rich and sweet, ripens later than Concord. Vine hardy and productive.

Salem. Fruit early, rich and high quality, dark red.

Martha. White, turning to pale yellow when ripe; skin thin; flesh very sweet and juicy; bunches and berries medium. A little earlier than Concord.

Asparagus Roots

(Price List on Pages 43 and 44.)

No garden is complete and no housewife has justice done her unless provided with a bed of this excellent and most wholesome vegetable. Coming as it does, next to the earliest of vegetables (rhubarb being the earliest), its value is very great. It is most beneficial in bladder and kidney troubles. A bed once established will give an abundant supply for a generation.

Our Modern Methods Book Tells How to Grow Asparagus, Figs, Rhubarb, Etc., to Perfection.

Horse-Radish

Thrives in Any Fence-Corner or Spare Space.

It is easy to grow as a weed, and every good housewife knows its great value in the making of sauces and seasonings. Once used in pickle it will never be gone without. Horse-radish sauce is one of the chief appetizers of the golden old-time Southern cuisine. It is also one of the few sauces or condiments that is pronounced by the best authority to be perfectly wholesome. A dozen plants will supply a large family for life-time and it grows and multiplies very fast.

Fig Bushes

FOOD AND MEDICINE IN ONE

This luscious and mildly laxative fruit—old almost as time itself—the fruit that refreshed and nourished the men who made history in Bible days, is about the easiest of all to grow. After the first year or two it needs no further attention unless you are far enough north for the branches to be winter-killed. With a few cedar or pine bushes stacked around it as cold weather sets in, it can be fruited much farther north than is usually believed. In the southern and central parts of the country (except in the mountainous portion of the central parts, where it will need protection), it thrives without attention, growing into 10-foot trees and producing amazingly of its delicious and wholesome fruit—ten bushels to the tree has been known.

No southern home is half complete without its Fig bushes and Scuppernong vines. We grow the Brown Turkey Fig, which we find to thrive and bear heavily over a wider range of country than any other kind.

Brown Turkey. Large; skin dark brown; flesh red; very delicious. One of the hardest and we consider the best variety on the market.

Brunswick. Very large, purplish black. A good quality and a good bearer.

Celestial. Medium size, pale violet. A sweet and excellent fig.

Green Ischia. Medium size, rosy red. A variety of good quality.

Everbearing Raspberries

We do not list separate varieties of Everbearing Raspberries because not any of them seem to be suited to all localities. We have in stock the St. Regis and other valuable varieties, and if you specify Everbearing Raspberries on your order we will send the sort best suited to your vicinity.

Price List Pages 43 and 44.

Spring-Bearing Raspberries

Cuthbert. The best red kind for the South. Fruits are always large and sweet.

Cumberland. Berries are large and handsome; plants quite hardy and productive.

We can supply other varieties.

DEWBERRIES

Lucretia. The one best variety; larger, and with a better flavor than blackberries.

BLACKBERRIES

Early Harvest. Medium-sized berries of excellent quality. The canes are most prolific.

RHUBARB (Pie Plant)

This is exceedingly easy to grow and, like asparagus, once set, lasts for years. It is much earlier than asparagus. The edible parts are the stems of the long leaves. These can be cut as fast as they come in the spring, and stewed with sugar, make most delicious and wholesome pies, tarts, and sauces. Stewed rhubarb also makes a most excellent breakfast dish. In all respects it may be used in the place of cranberries.

THE WAY OUR CUSTOMERS FEEL ABOUT US

I'd like to say in appreciation that I have never bought from a nursery that I like to deal with so well as yours. Mrs. A. T. Seymour, Apex, N. C., Nov. 8, 1926.

10-YEAR CUSTOMER THOROUGHLY SATISFIED

Enclosed find cashier's check for \$22.50 for which please send me trees. I wish to advise you that I have been a regular customer of yours for over ten years, and your trees have always been thoroughly satisfactory in every way. Have never had one reason to complain. D. G. Stone, Williamston, S. C., Nov. 27, 1927.

BEST GOODS ON EARTH

You send out the best goods on earth is why I send order. M. Z. O'Neal, Greenville, Ga., Sept. 15, 1926.

OUR CUSTOMERS STAY WITH US

Enclosed find check for \$12.50 for which please send the following-named goods. You will remember me to be an old customer. I have bought several bills of goods from you. I wish to say I have found your goods to be very satisfactory. Mrs. J. I. Bradshaw, Erwin, Tenn., Nov. 22, 1926.

Enclosed find check for \$8.00 for four Stuart Pecan trees. My mother bought things from your place for many years, and always thought you so very reliable. Mrs. Andrew C. Erwin, Athens, Ga., Nov. 27, 1926.

Our Frost-Proof Cabbage Plants

Will Mature Heads Two to Three Weeks Earlier Than Your Home-Grown Plants and Double Your Profits. Why?

There are a number of islands along the seacoast of South Carolina, where the soil and climatic conditions are just suited for growing tough, hardy cabbage plants during the Winter and early Spring. The plants make a slow but steady growth, until at eight to ten weeks of age they are very tough and hardy, the buds are purple and the outer leaves a reddish brown. When in this condition they can be shipped to territory farther north and be planted in the open ground a month to six weeks sooner than the home-grown hot bed or cold frame plants. These **FROST-PROOF CABBAGE PLANTS** will stand a temperature of 20 degrees above zero without injury. The land freezing, or the plants being covered with ice, sleet or snow after they are

planted will not injure them, providing temperature does not go below 20 degrees above zero.

The top of the plant does not grow until your regular Spring weather opens up, but the roots grow from the time they are planted, and just as soon as spring weather starts the established root growth assimilates the fertilizer in the soil, the plants grow very fast, maturing headed cabbage two to three weeks sooner than you can mature them from hot bed and cold frame plants. You know what the difference in profit will be if your crop is matured and marketed before the general crop from home-grown plants is matured.

To get the advantage of these frost-proof Cabbage Plants they must be planted a month or six weeks earlier than you would plant home-grown plants. We fill orders from December 1st to May 1st.

The plants when received will be somewhat wilted and have a hard, stunted appearance, which will be disappointing to persons who have never used these plants before. Regardless of appearance, they will produce the crop results.

Varieties: Early Jersey Wakefield, Charleston Large Type Wakefield, Copenhagen Market, Succession and Early Flat Dutch

Prices by Parcel Post, postage paid. In lots of 100, 200, 300 or 400 plants at 50c. per 100 plants; 500 plants for \$1.60; 1,000 or more at \$3.00 per 1,000 plants.

Orders are filled by the 100, not 250 or 350. These prices are for even quantities of one variety to package; if you ordered 200 of one variety and 300 of another variety you would pay at the 100 rate.

Prices by Express, buyer paying express charges. In lots of 1,000 to 3,000 plants at \$2.00 per 1,000; 5,000 or more at \$1.50 per 1,000. Plants packed for express shipment, 1,000 or 2,000 plants of a variety to package, they weigh about 25 pounds per thousand plants, packed for shipment.

Order Early to Get Plants Delivered in Time

When we receive your order for these plants, we have to forward it to our growing station, which takes several days. Plants are shipped direct to you from growing station. Plants cannot be pulled or shipped when beds are wet. We sometimes have a week or ten days of continued wet weather, which prevents shipment. If you do not receive your plants as soon as you expect them, you will know that weather prevents shipment. Send your order two to three weeks before you expect to set the plants and you will get them on time.

ONE OF THE HUNDREDS OF CABBAGE PLANT TESTIMONIALS WE HAVE ON FILE

I ordered 500 frost-proof cabbage plants to be sent about Mar. 20. They arrived Mar. 22nd in A1 condition. I have found you to be a reliable firm after several years dealing with you. Your price is higher than some, but I get nice plants, prompt service.

Mrs. M. E. Kates, Columbia City, Ind., Apr. 9, 1927.

Amoor River Privet makes a neat boundary.

Grow a Perfect Hedge as Quick as a Hill of Beans

Yes; just as quick. Plant this fall, winter, or spring and before July there, as if by magic, stands your Hedges. Three months of growing makes it instead of three years. With more time the Hedge can be grown to any height up to 10 feet, if desired as a windbreak, to give privacy to back yards, etc. Most Hedges are thin along the bottom; ours are as solid as a brick wall. Price list on page 44.

Our Book, telling and showing by plain cuts just how to grow a perfect hedge, is free with every order of \$5 and over.

Amoor River Privet. A quick and close-growing plant. Color a beautiful light green. Remains green through the hottest summer and coldest winter. Makes a magnificent hedge.

California Privet. We can also supply this variety, but recommend Amoor River, as it is a genuine evergreen.

Berberi Thunbergii (Japanese Barberry). The best deciduous Hedge Plant. It is beautiful throughout the year. Its abundant crop of bright red berries makes it as attractive in the fall as in the summer. It requires no attention, except occasional cutting back of a few straggling branches. Hardy, of easy culture, and will grow in any soil or situation. During the growing season the foliage is attractive, because the new growth, light-green in color, is in sharp contrast to the foliage of the old, which is a glossy, dark, rich green. It is important to remember that this is not the Barberry that harbors wheat rust. Japanese Barberry can be used with entire safety. Price, 40 cents each. \$25.00 per 100. Select three-year plants.

Ornamentals

AMERICAN ARBOR VITAE.
One of the best for the South

In many parts of the South too much attention is paid to fruit and crops and entirely too little to the appearance of the house and grounds. At very little expense you may have shade trees about your house—not only for appearance but for the sake of comfort as well. About the base of the house you can plant Spirea, Abelia, etc.; the same shrubs massed in a corner of the lawn will make a splendid display.

Maples are among the best shade trees as they make a fast and regular growth; the heads of the trees always assume pleasing shapes.

If you wish to combine shade and profit at the same time, plant Pecan trees around your home, in a few years they will provide abundant shade and you will be assured of a supply of valuable nuts.

You can easily avoid bare grounds by the careful arrangement of evergreens. No matter how severe the winter may be, they are always green and cheerful, and in shape are always beautifully symmetrical.

Evergreens

American Arbor Vitae. Valuable as a single specimen and for hedges. Can be trimmed to any form. One of the best for southern home grounds. Price \$2.50 each.

Pyramidal Arbor Vitae. Quite similar in growth to the American Arbor Vitae, except for shape. Price \$2.50 each.

Globe Arbor Vitae. Almost a perfect globe in its outline, attracting considerable attention because of the form. Especially valuable for specimens and formal plantings. The foliage is very compact. Price \$2.50 each.

Hovey Arbor Vitae. Similar to the preceding, but more open in growth and somewhat larger. Specially useful in plantings where the space is limited. A strong and vigorous sort. Price \$2.50 each.

Chinese Arbor Vitae. A medium-sized dense-growing evergreen whose foliage turns to rich brown in autumn. Of rapid growth. Price \$2.50 each.

Norway Spruce. Grows into fine large trees, or if it is kept clipped it will make a good hedge. Price \$2.50 each.

Douglas Golden Arbor Vitae. One of the hardiest of all golden evergreens. Broad and bushy growth with long, slender branches and bright yellow foliage. Price \$2.50 each.

English Juniper. A magnificent variety; highly valuable for specimen planting. Silvery blue foliage. Tall growing. Price \$2.50 each.

Irish Juniper. Probably the most beautiful of the species; very graceful. Foliage has silvery blue tinge. Price \$2.50 each.

Retinispora Plumosa. Small, dense, plume-like foliage of a light green color. Suitable for massed planting. Price \$3 each.

Retinispora Plumosa Aurea. Same as preceding except the foliage, which is golden. Price \$3 each.

Retinispora Squarrosa Veitchii. Dense growth; soft beautiful silvery blue foliage, arranged in spirals which gives the impression of boiling over. Price \$3 each.

Pfitzeriana Juniper. A very graceful, bushy plant with bright green foliage; holds color well throughout the year. Price \$3 each.

Tom Thumb Arbor Vitae (Ellwangerana). Low, broad, pyramidal, with slender branches clothed with two kinds of foliage. Very symmetrical and popular for beds, borders and foundation planting around base of house or porch. Price \$2.50 each.

The above Evergreens are shipped with a ball of earth attached to the roots—the only safe way to ship evergreens. All first-class specimens.

Flowering and Other Shrubs

HYDRANGEA AND BARBERRY THUNBERGII

An Attractive Arrangement.

All Shrubs Two Years Old and Strictly First Class

ALTHEA (Rose of Sharon)

The Altheas are fine, free-blooming shrubs, of easy cultivation and desirable on account of their late summer-blooming.

Ardens. Bluish purple; a distinct color and good variety, 50 cents each.

Duchesse De Brabant. Flowers large; very double, of reddish lilac color. One of the best varieties. 50 cents each.

Jean d'Arc. Double; pure white. 50 cents each.

White with red centers. Single flower. 50 cents each.

Pink. Finest pink, single flower. 50 cts. each.

Purple. Double flower, purple bud. 50 cents each.

Variegated. Double pink and white mixed color, 50 cents each.

BERBERI THUNBERGII

Beautiful dwarf Barberry from Japan. Has small, bright green foliage, changing to red in fall. Price 40 cents each. \$25.00 per 100.

BUDDLEIA

Butterfly Bush. Rapid grower. Long spikes of lilac-like flowers during summer. Attractive to butterflies. Dies back in winter. Price 60 cents each.

CREPE MYRTLE

A shrub growing to be 20 or 30 feet high. Flowers are produced in large clusters and over a period of two or three months. There are several varieties, of which we grow four—purple, rose, scarlet, white. This beautiful shrub or small tree, is distinctly southern in character, and should be used freely. Price 75 cents each.

Pearl Bush. In April and May the bush is literally covered with white star-shaped flowers, borne in racemes. The leaves are bright green and fade to brilliant tones of yellow in the fall. One of the most beautiful early flowering shrubs. Price 60 cents each.

DEUTZIA

Showy, profuse-flowering shrubs of easy culture.

Candidissima. Of recent introduction. Flowers pure white, large; very desirable. Price 50 cents each.

Crenata. Clear white flowers of large size. Plants thrive in almost any situation. Price 50 cents each.

Gracilis. Much used in foundation plantings about the house. Flowers white, single, and abundant. An especially good low-growing plant. Price 50 cents each.

Fortunei. Large, double white flowers with yellow centers.

Pride of Rochester. Origin, Rochester, N. Y. Large; double white flowers, back of petals being tinted with rose; excels most of the old kinds in flower and vigorous habits; quite early and very handsome. Price 50 cents each.

DOGWOOD

White Flowering. Small growing tree, covered in early spring with a mass of large white flowers. Price \$1.00 each.

FORSYTHIA (Golden Bell)

Very early-flowering shrubs with bright golden flowers, conspicuous yellow bark. The drooping variety is valuable for covering large banks. Price 50 cents each.

Flowering and Other Shrubs—Continued

BRIDAL WREATH SPIREA
One of the Most Beautiful Shrubs.

Virdissima. (Golden Bell) Erect, green barked branches, narrow leaves, and golden yellow flowers in March. Very good bloomer. Price 50 cents each.

Drooping. Growth, slender drooping; flowers yellow. Price 50 cents each.

HONEYSUCKLE

Red Tartarian. A beautiful shrub of upright, medium growth, purplish red flowers appearing in late spring, followed by crimson fruit; highly desirable for beauty. Price 60 cents each.

White Tartarian. Same habits as above, only white. Price 60 cents each.

HYDRANGEA

A group of shrubs, including some of the most showy plants known. Flowers borne in large panicles from July to September. Do best in fairly rich soil.

Arborescens. American Everblooming Hydrangea. Blooms from early May until the end of the growing season. The flowers remain pure white from four to five weeks, then gradually change to a light green. Price 75 cents each.

Paniculata Grandiflora. The old reliable variety, producing its flowers in large panicles often measuring six inches in diameter, in late summer and autumn. Price 75 cents each.

IBOTA PRIVET

One of the best shrubs for hedges, and likewise excellent for specimen use or mass plantings. Small white flowers are borne in numerous clusters and followed by black berries. The leaves are dark green and possess a brilliant luster. Price 50 cents each.

JAPAN QUINCE

Produces bright scarlet flowers, in great profusion, in early spring; very attractive and hardy. One of the best hardy shrubs. Price 60 cents each.

KERRIA JAPONICA

(Japanese Rose.) Bright yellow flowers, giving striking effects in spring. Slender green branches 4 to 6 feet long, with rough-veined leaves. Foliage attractive throughout the summer. Price 75 cents each.

PHILADELPHUS

Old-fashioned shrubs, much admired for their fragrant, white, star-like flowers, which are borne in a great profusion during May. Will succeed in partial shade.

Philadelphus Coronarius. Common Mock Orange. A hardy shrub attaining a height of 8 to 10 feet, with upright, often arching branches. Bright green leaves 2 to 4 inches long. Deliciously fragrant, creamy white flowers borne in great profusion. Price 60 cents each.

Grandiflora. Large-flowered Mock Orange. Rather tall, with graceful, spreading branches. Leaves bright green, 2 to 4 inches in length. Its flowers are the glory of this famous shrub; they are large, pure white and are borne in pairs of threes. Price 60 cents each.

LILAC

Common Lilac. The well-known old-fashioned Lilac. Hardy and vigorous; endures neglect and blooms abundantly. 75 cents each.

Common White. Flowers produced in slender panicles; pure white and fragrant. 75 cents each.

Rothomangensis. A distinct hybrid variety, with reddish flowers; panicles of great size and very abundant. One of the finest. 75 cents each.

Villosa. A species from Japan. Large branching panicles; flowers light purple in bud, white when open; fragrant. Especially valuable, as its flowers appear two weeks after those of other Lilacs. 75 cents each.

Flowering and Other Shrubs—Continued

SPIREAS

An indispensable group of flowering shrubs showing great diversity in size, character and time of bloom. They are exceedingly showy and do best in fairly rich soil.

Anthony Waterer. Free flowering. Crimson blooms in rather dense corymbs. A compact shrub. 3 to 4 ft. Bloom from June to frost, if kept growing and the old head clipped off. 50 cents each.

Billiards Red. Bright rose-colored flowers; bloom nearly all summer; desirable. 50 cents each.

Billiards White. Very similar to the rose-colored, but blossoms pure white. 50 cents each.

Bridal Wreath. A very beautiful variety; flowers pure white, small and very double; blooms very early. 50 cents each.

Bumalda. Clusters of beautiful rose-colored flowers in corymbs. 2 to 3 feet. July to September. Price 50 cents each.

Callosa Alba. White flowers in dense corymbs 2 to 3 feet. June to September. 50 cents each.

Douglas. Flowers deep pink, in dense panicles. Better foliage than that of *S. Billardii*. Upright grower. 4 to 6 feet. June and July. 50 cents each.

Opulifolia Aurea. Distinguished by its golden yellow foliage and double white flower. Blends well with any planting of shrubs. 50 cents each.

Prunifolia. Bridal Wreath. The long, slender branches form great garlands of snow-white double blooms, so closely are the flowers set along the entire length of stems. 50 cents each.

Van Houttei. The finest and most satisfactory of all spireas, either singly or among other shrubs. It forms a round and graceful bush, with arching branches, which, in April and May, are set from end to end with beautiful white blossoms. A shrub which cannot be overlooked. 50 cents each.

Thunbergii. Low growing, rounded form. Delicate foliage, which takes and retains most lovely tints in autumn. Small white flowers in profusion in March. A fine plant. 60 cents each.

SNOWBALL

Old-fashioned Snowball. Hardy, succeeds with little care. Flowers, white in cluster. 60 cents each.

Japanese Snowball. Surpasses any variety in flowers and foliage, if planted in partially shaded places. 75 cents each.

SUMAC

Smooth. A large shrub or small tree. Leaves compound, turning scarlet in autumn. Crimson fruit-clusters remain all winter. Price 75 cents each.

WEIGELIA

Hardy, easily grown and great bloomers. Of erect growth while young, but gradually spreading and drooping as they acquire age. They produce, in June and July, superb, large trumpet-shaped flowers of all shades and colors from pure white to red.

Candida. A strong-growing new variety bearing pure white flowers in great profusion. One of the best. Price 60 cents each.

Rosea. An elegant shrub, with fine rose colored flowers. Introduced from China by Mr. Fortune, and considered one of the finest plants he has discovered. Quite hardy; of erect, compact growth. Blossoms in June. Price 60 cents each.

CORAL BERRY

Indian Currant. Like the Snowberry, except its leaves are smaller, and the smaller dull red berries cling along the stems, which droop beneath their weight. One of the showiest berry-bearing shrubs. Price 60 cents each.

Flowering and Other Shrubs—Concluded

TAMARIX

These are very beautiful shrubs, with small leaves, somewhat like the Juniper, and delicate small flowers in spikes. They are invaluable for planting by the seaside, where scarcely anything else will grow.

Africana. (African Tamarisk) A tall, graceful shrub, with small foliage like the Juniper, and delicate, small, rosy purple flowers, produced in spikes; very pretty. Price 60 cents each.

Tetrandra. The most beautiful of the genus; flowers pale pink; blooms late summer. Price 60 cents each.

SNOWBERRY

These shrubs are valued for their bright persistent fruits, and for use as undergrowths in densely shaded places, where little else will grow. The two specials below are of slender, medium growth, and will flourish under trees or in any soil.

Snowberry. (Racemosus) — Inconspicuous rose-colored flowers in June and July; leaves thin, dark green; fruits large.

Red-Bud. Judas Tree. A small shrubby tree, shapely and uniform, bearing masses of reddish purple flowers, resembling small sweet peas before the leaves appear. 15 to 20 feet, April 5 to 25. \$1 each.

Hypericum. Gold Flower. A beautiful dwarf shrub, attaining a height of 1 to 2 feet. Leaves dark green. Large, single golden yellow flowers, 2 inches in diameter, are produced freely. Dies back in winter. June 15 to Sept 1. 75c each.

Jasminum Nudiflorum. Naked-flowered Jasmine. A graceful shrub, with quadrangular, drooping branches. Foliage dark green, falling in late autumn.

Flowers bright yellow, opening in early

spring, or on warm days in winter. 3 feet. February to March. 75c each.

Prunus Pissardii. Purple-leaved Plum. One of the most desirable of the purple-leaved trees, as it retains its color throughout the season and holds foliage very late. A fine specimen for bringing color into the shrubby border. \$1 each.

Double Flowering Peach. A dwarf-growing tree which is completely covered with beautifully formed and highly-colored flowers in spring. Makes a handsome show, either in masses or single specimens. White and red. 75 cents each.

Almond, Flowering (Pink). A beautiful, early blooming, dwarf shrub of shapely, compact growth, especially valuable because of the profusion of flowers which come very early in the Spring. Price 75c each.

CLIMBING VINES

Clematis. Paniculata—Valuable for covering arbors, trellises and porches. Small, white flowers, borne in long, slender clusters, cover the plant with a mass of bloom, August. Price 50 cents each.

Wisteria. Japanese—A fine climber, having purple flowers, borne in long, open clusters. Price 50 cents each.

Virginia Creeper. The large handsome leaves are deeply cut into five lobes. The blue berries contrast handsomely with the brilliant crimson shades which the foliage assumes when touched by frost. Price 50 cents each.

English Ivy. A grand, high-climbing evergreen vine, clinging to walls or trunks of trees and often attaining great height. Dark green leaves of exquisite outline and beauty. Price 50 cents each.

Broad-leaved Evergreens

This classification includes a number of highly desirable ornamental plants which we have learned by practical experience to be splendidly adapted to Southern planting. All are desirable because of their foliage, which remains bright and green the year round; many of them have lovely flowers and bright berries.

Most of the broad-leaved evergreens are easily grown. Given a fairly rich, moist, well-drained soil, and sufficient mulching to keep the roots from extremes of heat and cold, most of these will grow and thrive with comparatively little care, providing those charming effects of foliage and flower that every garden needs, and that are the admiration of all. Almost all do well in partial shade. In transplanting, the leaves should all be trimmed off, to insure success. Cut back stray shoots in early spring; otherwise they require little pruning.

ABELIA

Grandiflora. A very free-flowering shrub. In the south, the dark, glossy leaves remain on the branches all winter. The white flowers, touched with pink, are borne in great profusion, and appear from early summer until frost. They are about an inch long and have a deep, slender throat. 3 year plants. \$1.00 each.

Ligustrum Lucidum. Large, thick, dark shiny green leaves. Flowers white, produced in May and followed by black berries, which are retained through the winter. Attains a height of 10 to 12 feet. A very desirable variety. Extra fine plants. \$1.50 each.

Ligustrum Japonicum. A beautiful, broad-leaved evergreen shrub of dense and symmetrical outline. The creamy white flowers are borne in panicles and followed by purple berries. Grows 10 to 15 feet tall. Extra fine plants. \$1.00 each.

Euonymus Japonica. Evergreen Euonymus. Handsome, large shrubs, glossy green leaves, hold their color all winter; hardy. Red berries. Extra select plants. \$1.00 each.

Dwarf Box. Succeeds in most well-drained soils, requiring protection, however, against extremes of both heat and cold. Some shade is nearly always desirable. Leaves small, glossy, bright green. \$2.00 each.

Euonymus Sieboldiana. New. A very attractive creeping Japanese variety, with handsome dark green foliage. Perfectly hardy in any climate. \$1.00 each.

English Laurel. Valuable shrubs, whose principal merits are their great vigor, beautiful, broad shining foliage, and ease of cultivation. \$2.00 each.

Cherry Laurel. A hardy evergreen with shiny green leaves. A fine tree for grouping or to be used as a background. Can also be trimmed into formal shapes. \$2.00 each.

Umbrella Tree

(Price List on Pages 43 and 44.)

For some years this has been most popular as a specimen tree for the lawn. It makes a fairly rapid growth, with a large spread, but flattish head. When it has grown for several years it bears quite a remarkable resemblance to an umbrella in shape.

A slight winter protection given by straw, paper or pine boughs tied about the trunk will promote more rapid growth for several years.

The tree has been so popular that some nurseries could not obtain the true strain, so they substituted other sorts. We absolutely guarantee that our trees are pure Umbrellas. First-class trees, \$1 each; extra fine, \$1.50.

French Hydrangeas

Very attractive when used as tub plants for decorating steps or porch. Can be used in open ground if protected with burlap or straw during winter months. Cover a long blooming season and a beautiful shrub (2 year plants). **PRICE 75c each.**

Otaska. The old stand-by. Blue.

Mousseline (The Famous Blue Hydrangea). With us a beautiful plumbago-blue; flower heads are large and held erect; a decided acquisition.

Mme. E. Mouillere. A favorite white variety; free flowering and of good size and form.

Avalanche. A splendid large white, which has made a reputation for itself during the past two seasons. An easy variety to force.

Mme. Auguste Nonin. An unusually attractive pretty pale pink in heads of large size.

Boquet Rose. Large trusses of well-formed flowers, rosy amber turning to bright pink; has proven a special favorite in the New York market.

E. G. Hill. This is the newest one and the very best, and is by far the best pink that we have yet tried; trusses of immense size. Color a most pleasing shade of baby-pink that does not fade. Growth vigorous, foliage large and attractive. It is one of the easiest to force into bloom

during the spring, coming into flower early.

Radiant. Very deep carmine; one of the finest.

Etincelante. A clear carmine; a clean vigorous grower of unusual merit.

Lilie Mouillere. Similar to, but distinct from Eclairer; a bright carmine-rose.

Baby Biminet. Very dwarf, free and early; large compact trusses of silver-rose flowers; very attractive.

Satinet. This variety is so radiant that it resembles a dainty piece of satin; probably the best of all the French Hydrangeas. Color a beautiful rose.

Souvenir De Madame E. Chautard. One of the best; of splendid erect habit; very robust. Fine sized heads of bright rose-colored flowers.

Pres. Fallieres. Very delicate rose.

General de Vibray. A favorite wherever seen. Large heads of bright rose-colored flowers. A splendid early forcing variety.

SUGAR MAPLE

The best Maple for Quick, Permanent Shade.

Shade Trees

(Price List Page 44.)

Aside from the satisfaction and comfort you will derive from properly planted and properly shaded grounds, do you realize that as an investment there is nothing that returns such dividends as the beautifying of the grounds around your home? Real estate men all over the country all agree that a place properly planted with trees and shrubs will, other things being equal, always find the quickest sale. The prices we name are for first-class, well-shaped, strongly-rooted trees.

Norway Maple. Very popular on account of its clean, large leaf of deep, rich green; stout, vigorous growth. A beautiful tree and makes a dense shade. Very hardy, easily transplanted, very compact in form, grows rapidly, and is exceptionally free from injurious insects. (12 feet and up.) \$3.50 each.

Sugar Maple. Its fine, clean, pyramidal growth and foliage make it very desirable. One of the finest shade trees. A very popular American tree. Used extensively to good advantage for street and avenue planting. (12 feet and up.) \$3.00 each.

Silver Maple. The most rapid growing of the Maples, a habit which combined with size, form, grace and beauty, gives it great value. The foliage is light green, silvery white on the under side. It is a very graceful tree, perfectly hardy, and is valuable for street planting where quick results are desired. 12 feet and up. \$1.50 ea.

Lombardy Poplar. A tall, slender, rapid-growing tree; useful in producing attractive effects in many situations. 10 feet. \$1.00 each.

Carolina Poplar. A large sized tree of very rapid growth. 8 to 10 feet. \$1.00 each.

Pussy Willow. A small tree with upright or ascending branches. Leaves green, relatively large and broad. Catkins very numerous, appearing in early spring before the leaves put out. Handsome in flower and greatly esteemed by reason of its earliness. 12 to 25 ft. February, March. \$1.00 each.

Weeping Willow. A very beautiful tree of weeping habit, obtaining a height of 30 to 40 feet, with slender olive-green branches and long green leaves. Very beautiful where given plenty of room. 10 feet and up. \$1.50 each.

Elm, American. A tall, stately tree with graceful branches. A fast grower. 8 to 10 feet. \$1.50 each.

Willow Oak. A beautiful shade tree. 12 ft. and up. \$3.00.

PEACH ORCHARD FOR \$10.00

Delicious Peaches Every Day from May to November (June to Oct. in the North)

This collection will plant one-fourth an acre and commence bearing in two years. Will supply all the peaches you need for canning, preserving, etc., and give you a large surplus which can be easily sold for fancy prices. Just let it be known that you have nice peaches and people will come to your orchard and buy all you have and want more. We have customers making big money on small family peach orchards.

Trees in this collection are the very pick of our immense stock, so perfectly balanced in root and branch growth that they will grow fast and come quickly into bearing. They are put into perfect shape before leaving us by being pruned root and branch precisely right, saving you all doubt and trouble in that respect. They are packed with extra care so as to arrive as fresh as when dug. With each collection is sent enough

strongly concentrated (highly ammoniated) Modern Method Fruit Tree-Food to push the trees into quick growth and fruiting. This food, combined with their superior vigor, brings them into bearing at two years old, a year younger than ordinary trees.

We also send our 100-page book, worth \$25 to any fruit-grower because it not only tells, but shows, by clear practical cuts, how to plant, prune, manure, and cultivate all kinds of fruit. Page 13 tells also about the book and fruit tree-food. See page 3 for collection of Peaches selected for their delicious flavor, ripening without a break from May to November.

EVERY TREE IN THIS COLLECTION IS INSURED TO LIVE OR WE REPLACE ABSOLUTELY FREE.

2 Select Trees NEVA-MYSS. Earliest of all peaches, has never failed to bear. May.....	\$1.20

SHRUBS FINE SPECIMENS, MUCH PLEASD

My order of shrubs, trees, etc., came this morning. They are fine specimens and I am much pleased with them. Mrs. H. Smith, Monroe, N. C., Mar. 14, 1927.

SHRUBS DONE WONDERFULLY WELL; ORDERS MORE

Enclosed find check for \$9.35 for shrubs. The shrubs I bought from you in the spring have done wonderfully well. Mrs. Henry F. Long, Statesville, N. C., June, 1926.

ABELIAS FINEST EVER SAW

I received my shrubbery in fine shape. The Abelia was the finest I ever saw. Mrs. J. T. Nuckolls, Seale, Ala., Dec. 18, 1926.

MUCH PLEASD WITH SHRUBS; ORDERS MORE

I was very much pleased with the order of shrubs you shipped me a few days ago. I want to order 100 Japanese Barberry. In your catalogue you quote the price per 100 at \$25.00, so I am enclosing a check for \$25.00. Miss Gladys Ross, Hendersonville, N. C., Dec. 10, 1926.

CATALPA BUNGII

Catalpa Bungii. A beautiful and valuable tree of rather dwarf growth. Forms an umbrella shape of deep green leaves striking in this effect. When used for borders of paths this tree gives a formal finish not readily obtained with other trees. We consider it one of the most beautiful trees of its kind. See actual photograph above. 5 to 6 feet. Price \$2 each.

OUR GUARANTEE

Our stock must satisfy our customers. We strive as hard as mortals can to fill every order just right, but if by any means a mistake should occur, we want to know it. Write us if anything whatever is wrong. An order is not considered complete on our books until our customer is satisfied. In other words, we guarantee satisfaction, and our bank references will tell you we are good for our contract.

We want our customers to feel that we are just as much interested in their success with our trees and plants as they are themselves and are just as anxious for them to succeed with them. Should they at any time need information as to cultivation, spraying, etc., our forty years' experience is at their command.

OUR REFERENCES

Write and find out all about us (enclosing stamped envelope for reply) from Citizens' Bank, Henderson, N. C.; First National Bank, Henderson, N. C.; Citizens' National Bank, Raleigh, N. C.; Old Dominion Trust Co., Richmond, Va.; Federal Trust Co., Richmond, Va.

IMPORTANT NOTICE TO OUR CUSTOMERS

We have everything straightened out in our new building and can handle your orders to your entire satisfaction. If any mistakes have been made, our customer will confer a favor upon us by calling our attention to any unsatisfactory deal, no matter whether it occurred in 1883 or 1926. If anything is wrong at our end, favor us by writing about it. It will be a favor to us, and all such mistakes will be corrected.

We strive as hard as mortals can to have everything just right, but sometimes we make a mistake. Any of our customers will confer a favor upon us by calling our attention to any unsatisfactory deal, no matter whether it occurred in 1883 or 1925.

We have had good seasons and have an exceptionally fine stock. We can handle your order promptly, and we guarantee satisfaction in every respect.

Price List—Fall and Winter, 1927-28

STRAWBERRY PLANTS

Grown by modern methods—that is from parent plants not allowed to weaken themselves by fruiting last spring, and which just before planting were treated by fungicides. This renders the plants they produce free from the rust and fungus which annually lessen the Strawberry crop of the country 10 to 50 per cent. See pages 9 and 10.

NEVER-STOP STRAWBERRY lowers cost of living. So sweet it needs no sugar.	10,000 and over, per 1,000	5,000 to 10,000 per 1,000	3,000 to 5,000 per 1,000	1,000 to 3,000 per 1,000	500	100	50	25

GIANT (Per.)

Under this head we class several varieties of enormous size and will send you the one best suited to your locality. \$1 for 25, \$1.75 for 50, \$3 per 100.

NEVER-STOP The Wonderful Everbearing Strawberry. Fruits regularly spring, summer and fall; fine berries remaining under dense foliage till December. Succeeds where all other so-called everbearers fail. See testimonials from twenty states, page 7. We deliver free 100 plants and also 100 choice spring-bearing plants, selected with care all for \$4.50, and also a special strawberry Plant-Food which greatly increases the yield (see page 6) and our 100-page book, "Modern Methods in Fruit-Plant and Tree-Growing," which tells and shows by plain cuts how to plant, cultivate, manure and manage all kinds of Fruits, Pecans and Shade Trees, Rose Bushes, Hedges, Ornamentals, etc. Worth \$25 to any one wishing fine fruit or a beautiful yard.

Varieties of Strawberry plants marked (Imp.) have imperfect or pistillate blooms and should have every fourth row of the field planted in a (Per.) perfect or staminate blooming kind.

Write for special prices on peach trees and strawberry plants in large quantities.

When to Plant—In the southern and central parts of the country they can be set any time during the fall, winter or spring, that the ground is not actually frozen or mired, the earlier the better; at the North in fall or early spring. Plants shipped September 15 to April 15, or later, according to season.

We advise that you have all shipments of 500 plants or less sent by parcel post. They make quicker time, are delivered by mail carrier, and save you the time of going to express office for the shipment. When rates are nearly the same we will ship by parcel post if we think it to your best advantage, C. O. D. for amount of charges. If you do not wish this done, and if you prefer express shipment, so state on order sheet.

KLONDIKE and MISSIONARY are the Great Market Varieties. Our Stock is Simon Pure. **WRITE FOR SPECIAL PRICES IN LARGE QUANTITIES.**

WHAT WE DELIVER FREE

For the very choicest varieties of peach and apple trees, strawberry, raspberry and violet plants and rose bushes, all delivered free with book and plant-food, see pages 3, 5, 6, 14, 16, 21, 45 and 46. Only these collections are delivered free.

Doing a mail order business altogether, our stock of trees, plants, etc., is full and is strictly first-class. In fact, we sell under an absolute guarantee, as you will see by referring to page 42.

We make special prices to large planters of fruit trees. If in the market send us your list of wants, and we will quote you attractive prices. Quality considered, we meet competition from anywhere.

All orders for trees for less than \$1 must include 25 cents extra to cover actual cost of packing. All larger tree orders and all other orders packed free.

To Make Sure of Getting Just What You Want it is always best to send in your order as soon as you receive this catalogue. First-class stock will then be reserved for you and shipped when directed.

Time of shipment of fruit trees, shade trees, hedge plants, rose bushes, grapevines, etc., from October 15 to April 15. Plant in fall, winter or early spring, no matter how cold, if the ground is not frozen or muddy.

Write for special prices on peach trees and strawberry plants in large quantities.

Roses

Large, Hardy, Two-Year-Old Field-Grown Rose Bushes That Go Right Off to Blooming First Year

(See Cover Page 51 for Pictures of Our Roses)

12 LARGE, HARDY, TWO-YEAR-OLD, FIELD-GROWN ROSE BUSHES that go right off to blooming first year, Rose Plant-Food for two years, and 100-page book, "Modern Methods in Fruit, Plant and Tree-Growing." **ALL DELIVERED FREE FOR \$7.00.** Every plant insured.

You must not expect our rose bushes to come to you green and delicate like hot-house plants. Ours are hardened in the open air and are as vigorous as trees.

In the following list will be found the queens of rosedom, varieties selected for their surpassing beauty and for their vigor in producing abundant flowers.

This collection is made up of the very cream of varieties, assorted colors, white, red, pink, cream and yellows.

Every plant is especially selected and pruned in root and branch, to perfect balance for quick and big results. Remember that we send plant-food to make quick growth and quick superb blooms.

Yellow Roses

Alexander Hill Gray. Largest pure yellow. 60 cents each.

Blumenschmidt. Rich lemon-yellow, often tinged pink. 60 cents each.

Etoile De Lyon. Deep golden yellow. A double Rose. A magnificent bloomer. 60 cents each.

Lady Hillingdon. Deep golden yellow; superb. 60 cents each.

Helen Good. The color is a delicate yellow, suffuses with pink, each petal edges deeper; very chaste and beautiful. The color with its immense size and exquisite form, makes it without question the greatest Tea Rose ever introduced. A genuine Cochet. 60 cents each.

Madame Francisca

Kruger. A very deep yellow Rose; strikingly handsome. 60 cents each.

Madame Jenny Gillemot. 60 cents each.

Perle Des Jardins. Deep bud. 60 cents each.

Deep Saffron-yellow opening canary with golden shadings. 60 cents each.

Deep straw-yellow; some times deep golden-yellow; large bud. 60 cents each.

Pink Roses

Antoine Revoire. This is the famous Mrs. Taft Rose of the fashionable Eastern markets. This Rose is a class by itself; no Rose ever produced has such substance of petal; color creamy-white with rainbow tints; a beauty and a wonder. 60 cents each.

Bridesmaid. A fine, deep pink Rose, interesting for its great beauty as well as its sentimental name. 60 cents each.

F. R. Patzer. Creamy-buff, reverse delicate pink; extra fine. 60 cents each.

La France. This is claimed by many to be the queen of all the Roses; bright silvery-pink. 60 cents each.

Maman Cochet. (The Queen of all Garden Roses)—Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous, and cannot be seen in any other Rose we know of. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will, in the open ground, quickly make large strong bushes and produce on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to a silvery-rose. As we see it one good Rose like any of the Cochet Roses is worth a whole collection of poor ones. 60 cents each.

(PINK ROSES—Continued)

Paul Neyron. Deep Rose or bright pink; large. 60 cents each.

Pink Killarney. Clear rich deep shell-pink; a great beauty. 60 cents each.

President Taft. This Rose was raised in Cincinnati, the home of President Taft, and let us say right here, while some of you may not admire the President himself, you will, one and all, admire the Rose given his name. It is without question the most remarkable of all pink roses. It has shining, intense, deep pink color, possessed by no other rose. It is a fine grower, free bloomer, good size and form, fragrant and in a class by itself as to color. A gentleman who is probably familiar with more roses than any man in America says: "Talk all you want to about the Rose President Taft, and then you will not say enough." 60 cents each.

Radiance. A brilliant rosy-carmine, displaying beautiful rich and opaline-pink tints in the open flower. The form is fine, largest size and full, with cupped petals. It blooms constantly and is delightfully fragrant. This is a superior Rose. 60 cents.

William R. Smith. Cream color with soft pink shadings. One of the finest Tea Roses ever grown. 60 cents each.

Wellesley. A beautiful pink, the outside of the petals being very bright in color, with silvery reverse. 60 cents each.

Dr. W. Van Fleet. Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in center. 60 cents each.

Orleans. Showiest and prettiest of all Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink with distinct showy center of pure white; florets not crowded, but of beautiful arrangement, and cannot be beaten. The color is irresistible. Plant grows like a weed and flowers are nearly "immortelle" in their lasting qualities. 60 cents each.

"Modern Methods" Give You Magnificent Roses the First Year

What do "Modern Methods" mean? It means making the young rose plants hardy and vigorous by growing in the open and in just the right soil and using just the right rose plant food to give bushes a running start. That's our part. Then it means planting right, manuring right, pruning right, cultivating right. That's your part. But our book makes it all plain by not only telling but also showing by practical cuts just how to do it all.

White Roses

The Bride. Dear to the heart of rose lovers, not only for its sentimental name, but for its own glorious white self. 60 cents each.

Bessie Brown. Creamy-white flowers; sweetly scented. 60 cents each.

Frau Karl Druschki (or White American Beauty). This grand white Rose has become renowned as the very highest type of its class and the best snow white Rose ever introduced. It is an extraordinarily strong grower, and has the vigor and hardiness of an oak. Its magnificent flowers are nothing less than glorious-immense in size and produced with great freedom. Color is a marvelous white without tinge of yellow or any other shade. A true paper-white, the standard by which all white Roses are judged. 60 cents each.

Kaiserin Augusta Victoria. A grand white garden Rose that has stood the test of time. Full and double, fine buds and flowers. 60 cents each.

Marie Guillot. Pure white, with large buds and open flowers that are perfect as a Camellia bloom. 60 cents each.

WHITE ROSES--Continued

White Killarney. A pure white Rose producing beautiful flowers in great profusion. 60 cents each.

White La France. Pure white with shadings of fawn. 60 cents each.

White Maman Cochet. (No finer Rose than this).—This rose attracted our attention from the very first time we ever saw it in flower. It is of the largest size, and, as you will notice, the flower is built up or rounded and very double. The color is a pure snow-white. Sometimes out of doors it is tinged pink, which only adds to its great beauty. No rose surpasses it in vigorous growth and in the immense size of its buds and flowers—indeed, nothing in the Tea family approaches it in size. Deliciously fragrant. 60 cents each.

Red Roses

J. B. Clark. The color is unique among roses, being deep scarlet shaded blackish-crimson, with rich bloom like a plum; flowers are large and beautifully formed. Awarded the gold medal N. R. S. 60 cents each.

Ecarlate. Finest bedding rose known. 60 cents each.

Etoile De France. Brilliant Crimson. An abundant bloomer and a superb Rose. 60 cents each.

Eugene E. Marlitt. Flower large and double; of a bright carmine with scarlet tones. 60 cents each.

Francis Scott Key. It is a heavy double rose of great substance. In color red. 60 cents each.

Gruss An Teplitz. Bright crimson, white fiery-red centers; cup shaped; semi-double; flowers in clusters, presents a blaze of scarlet. 60 cents each.

Gen. Jacqueminot. Known as "General Jack;" shining crimson. 60 cents each.

General Washington. An old favorite; crimson red; large full flat form; a profuse bloomer. 60 cents each.

Helen Gould. A grand Rose of highest merit; bright watermelon red; very free grower and bloomer. 60 cents each.

Meteor. Vivid, glowing crimson, with a velvety texture. A truly magnificent Rose and a free and constant bloomer. 60 cents each.

Papa Contier. Rosy-crimson; fine long bud. 60 cents each.

Red Radiance. All who know that grand Rose Radiance will welcome this red form of that great favorite. Radiance is a Rose that does well everywhere; a fine grower and free bloomer, and no prettier pink Rose grown. Red Radiance is its exact counterpart except that the color is a rich deep red. 60 cents each.

Rhea Reid. Flower large and double; rich dark velvety red. 60 cents each.

Climbing Roses

American Pillar. Unusually large, single flowers, often 3 to 4 inches across, borne in immense clusters. The color is a delicate pink, with white eye and yellow stamens.

CLIMBING ROSES--Continued

Climbing Malmaison. Creamy-flesh; peach-pink center. 60 cents each.

Clothilde Soupert. Ivory-white; center deep silvery-rose. 60 cents each.

Climbing American Beauty. Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms three to four inches across; has proved perfectly hardy and stands heat and drought as well as any Rose in our collection. 60 cents each.

Climbing Kaiserin Augusta Victoria. (Mrs. Robert Peary.) Ivory white; elegant. 60 cents each.

Climbing Meteor. A grand climber, color velvety maroon. 60 cents each.

Crimson Rambler. A rampant grower; profuse bloomer of flaming red blooms. 60 cents each.

Excelsa. Flowers are very double produced in large trusses of 30 or 40. Color is intense crimson-maroon. The finest of all red climbing roses. Price 60 cents each.

Lady Gay. One of the most magnificent of all pink climbing Roses. 60 cts. each.

Lamarque. Pure white; very double, an old standby. 60 cents each.

Marechal Niel. All in all, this is the most popular of all Roses, as it is the most refinedly beautiful. Blooms an indescribable tint of yellow that is most beautiful and graceful; climbing vines are no less so. Verily, all in all a poem in Roses. 75 cents each.

Reine Marie Henriette. Deep cherry-red; a leading climber. 60 cents each.

Red Dorothy Perkins. Color is intense crimson-maroon. The finest of all Crimson Ramblers. 60 cents each.

Silver Moon. Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness. These flowers are borne on strong stems twelve to eighteen inches long, and are delicately scented. The plant is a strong grower, with large, glossy, bronze-green foliage. 60 cents each.

White Dorothy Perkins. This rose has no rival as a white climber. 60 cents each.

White Rambler. A rapid climber and grower, clusters of snow-white Roses. 60 cents each.

Yellow Rambler. A luxuriant grower and heavy bearer of beautiful yellow Roses. 60 cents each.

New Roses

Large, Hardy, Two-Year That Go Right Off to Blooming First Year.

We have tested these roses and they have genuine merit.

Yellow Roses

Hugonis. Single, yellow and fragrant. A natural species. (The golden rose of China.) 75 cents each.

FIGS BEAR IN ONE YEAR

I bought of you in the spring of 1922 three fig bushes, and in 1923 I had figs as large as eggs. I am ordering these for my friends. T. J. Mitchell, Reidsville, N. C.

FINEST HEDGE EVER SAW

I want to plant a hedge in the spring. A few years ago I got from you some hedge plant. They were the finest, I think, I ever saw. N. W. Plant, Fincastle, Va.

COLLEGE PRESIDENT SAYS HEDGE PLANTS WERE SATISFACTORY

I am inclosing check for \$30.00 to cover balance due on the hedge plants ordered of you as per inclosed statement. The plants are very satisfactory and I hope will do well. I still need several thousand, but owing to the lateness of the season will wait until another year. R. L. Robinson, President Woman's College, Due West, S. C.

Red Roses

Mrs. Benjamin R. Cant. Color deep rose; inner petals soft silvery-rose suffused with buff at the base. 75 cents each.

F. J. Grootendorst. Bud small, double, borne in clusters on average length stems; very lasting; slight fragrance. Color bright red, edges of petals serrated like a carnation. Foliage sufficient, small, leathery, wrinkled, dark green; disease resistant. Vigorous grower of bushy habit, bearing a profusion of blooms from June to October. Very hardy. 75 cents each.

Niles Cochet. (The True Red Cochet.) Red changing to deep rose. 75 cents each.

Therese Zeimet-Lambert. Type, Killarney. Bud large, long-pointed; flower large, full, double, high-centered; deep rose with yellow ground, orange base, borne singly, on long stem; strong fragrance. Foliage, bronze green, disease resistant. Few thorns. Vigorous, upright; intermittent bloomer, hardy. 75 cents each.

Pink Roses

Mrs. Charles Bell. It may be described as a shell-pink Radiance, and is a sport of that well-known Rose. It has no characteristics which make it distinct from Radiance except that it is shell-pink. Mrs. Charles Bell, Red Radiance and Radiance offer a range of color that will be welcome, and there are no finer garden Roses for America than these three. 75 cents each.

Lady Ursula. Color a most beautiful shade of flesh-pink of great substance and good form. 75 cents each.

President Wilson. A delightful shade of salmon-pink. Flowers of large size and exhibition quality, freely produced on erect stems. A great Rose. 75 cents each.

Climbing Roses

Ideal (Baby Rambler). Flower medium size, double, full, open, globular, dark velvety crimson; very lasting; borne in clusters on average stem; blooms abundantly all season. Hardy. 75 cents each.

Mary Wallace (A Great Breeder's Legacy). This is Dr. Van Fleet's masterpiece. The trade is slow in taking hold of this charming pillar rose. Hardy, on a line with Washington, D. C. Blooms two or three times during the summer months. A pillar rose supporting itself in a bushy growth 6 to 8 feet high. Bright clear rose-pink with salmon at base of petals. The largest Hybrid Wichuraiana in existence. 75 cents each.

HIGHLY PLEASED WITH STRONG, HEALTHY ROSES

I am in receipt of the two dozen rose bushes which I ordered from you recently, and wish to say that they are highly satisfactory and received in first-class condition. They are strong, healthy plants. I wish to thank you. I appreciate the extra attention given my order, also your nice letter received this morning. R. D. Smith, Dawson, Ga.

OUR ROSES ALL RIGHT

Please send me the collection of 12 roses. We have bought plants from you before and always find them all right. They have the finest roots and grow right off the best of any plants we ever bought. Mrs. A. W. Moore, Atlanta, Ga.

OUR MODERN METHOD ROSE BUSHES BLOOM ALL WINTER IN MISSISSIPPI

Have had superb roses all winter from those purchased from you two years ago. A red one in vase now looks like an American Beauty. Pink equally as large and beautiful. Miss Lillian McCormick, Shubuta, Miss.

ROSES BOUGHT 28 YEARS AGO PRETTIEST EVER SEEN, AND STILL AT WORK

The prettiest roses I ever saw I bought from you about 28 years ago. I want to get a few new roses, and would like to know what you can let me have one dozen for—the best you have. I still have the roses bought from you. Don't think I have lost a single one of them. Mrs. E. D. Davis, Standardsville, Va.
